General Introduction

ARTEOR™ —versatility and a global vision for any installation level

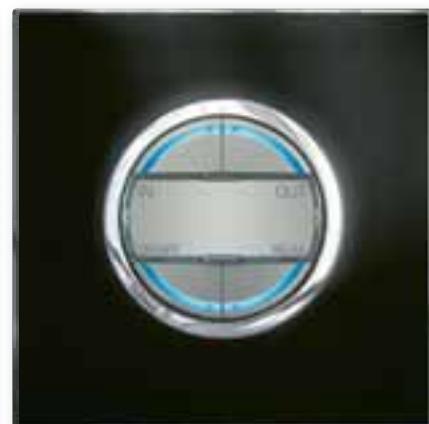

Arteor™ is the innovative answer to the increasingly complex requirements in the building business all over the world. Arteor™ excels by its unique aesthetics and a rich choice of innovative designs and ergonomical options.

The range extends from wiring devices, through innovative radio automation solutions, up to fully networked home automation systems based on BUS technology, which can also be integrated into third party solutions.

ARTEOR™: the ideal solution, always and everywhere

Its versatility makes Arteor™ the ideal choice for every kind of project, anywhere in the world at any installation level. Arteor™ suits any requirement in terms of design and function for every kind of building, from residential to commercial.

Multi-Dwelling Units

Villas

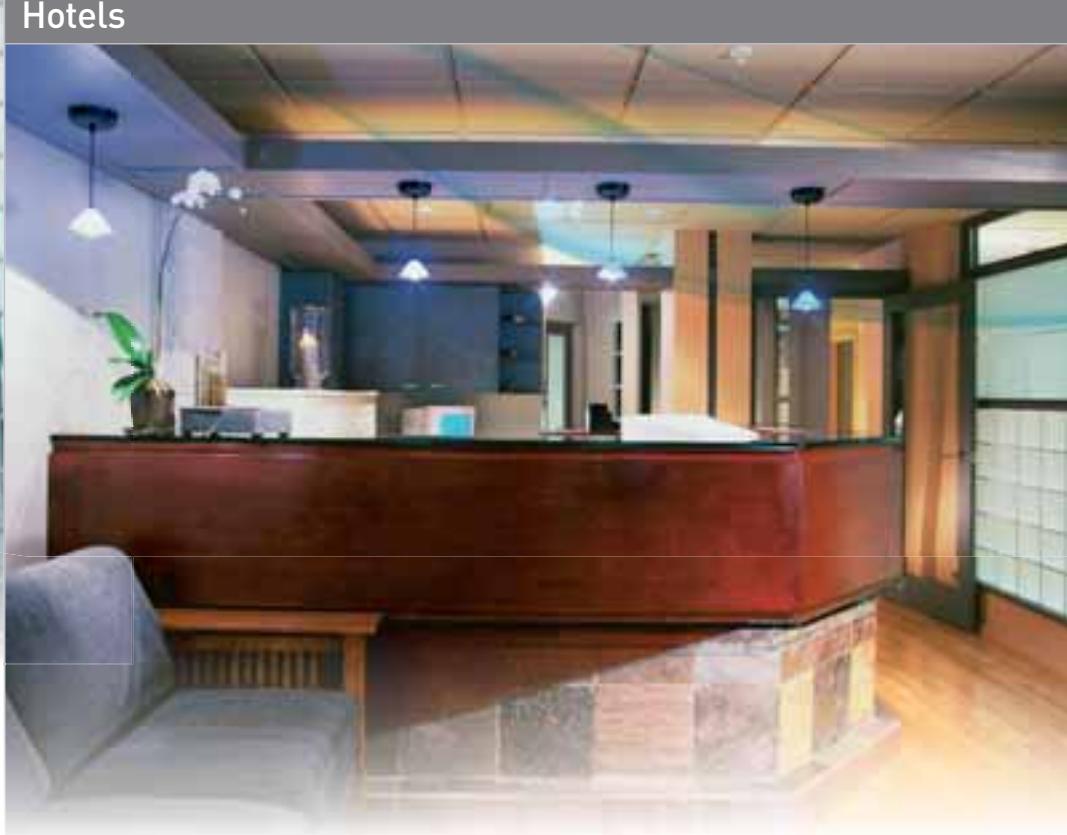

Offices

Hotels

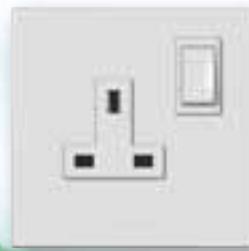

ARTTEOR™: truly international

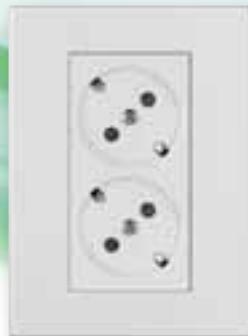

Euro/US, Italy, French
and German standard

British Standard

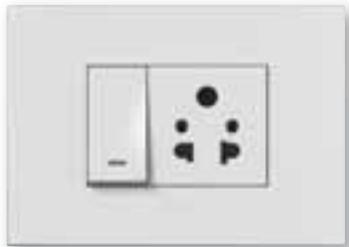

Korea

Euro/US/China

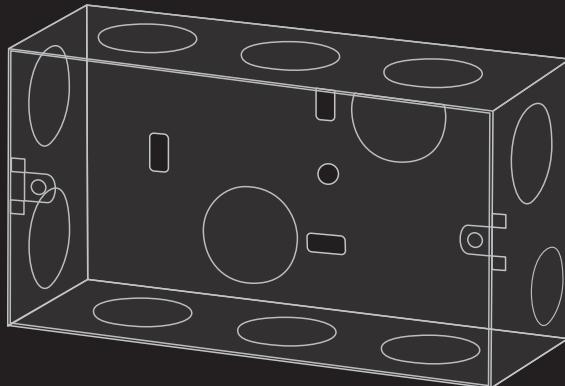

India

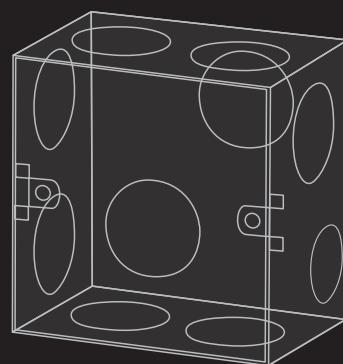

Arteor™ has been developed as an authentic international concept. This international approach enables it to fulfil local market requirements with specific solutions, designed to match local installation habits.

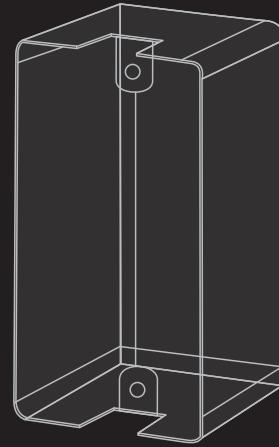

Arteor™ is compatible with any kind of wall box. Some examples:

Italian type

IS/BS type

US type

10

11

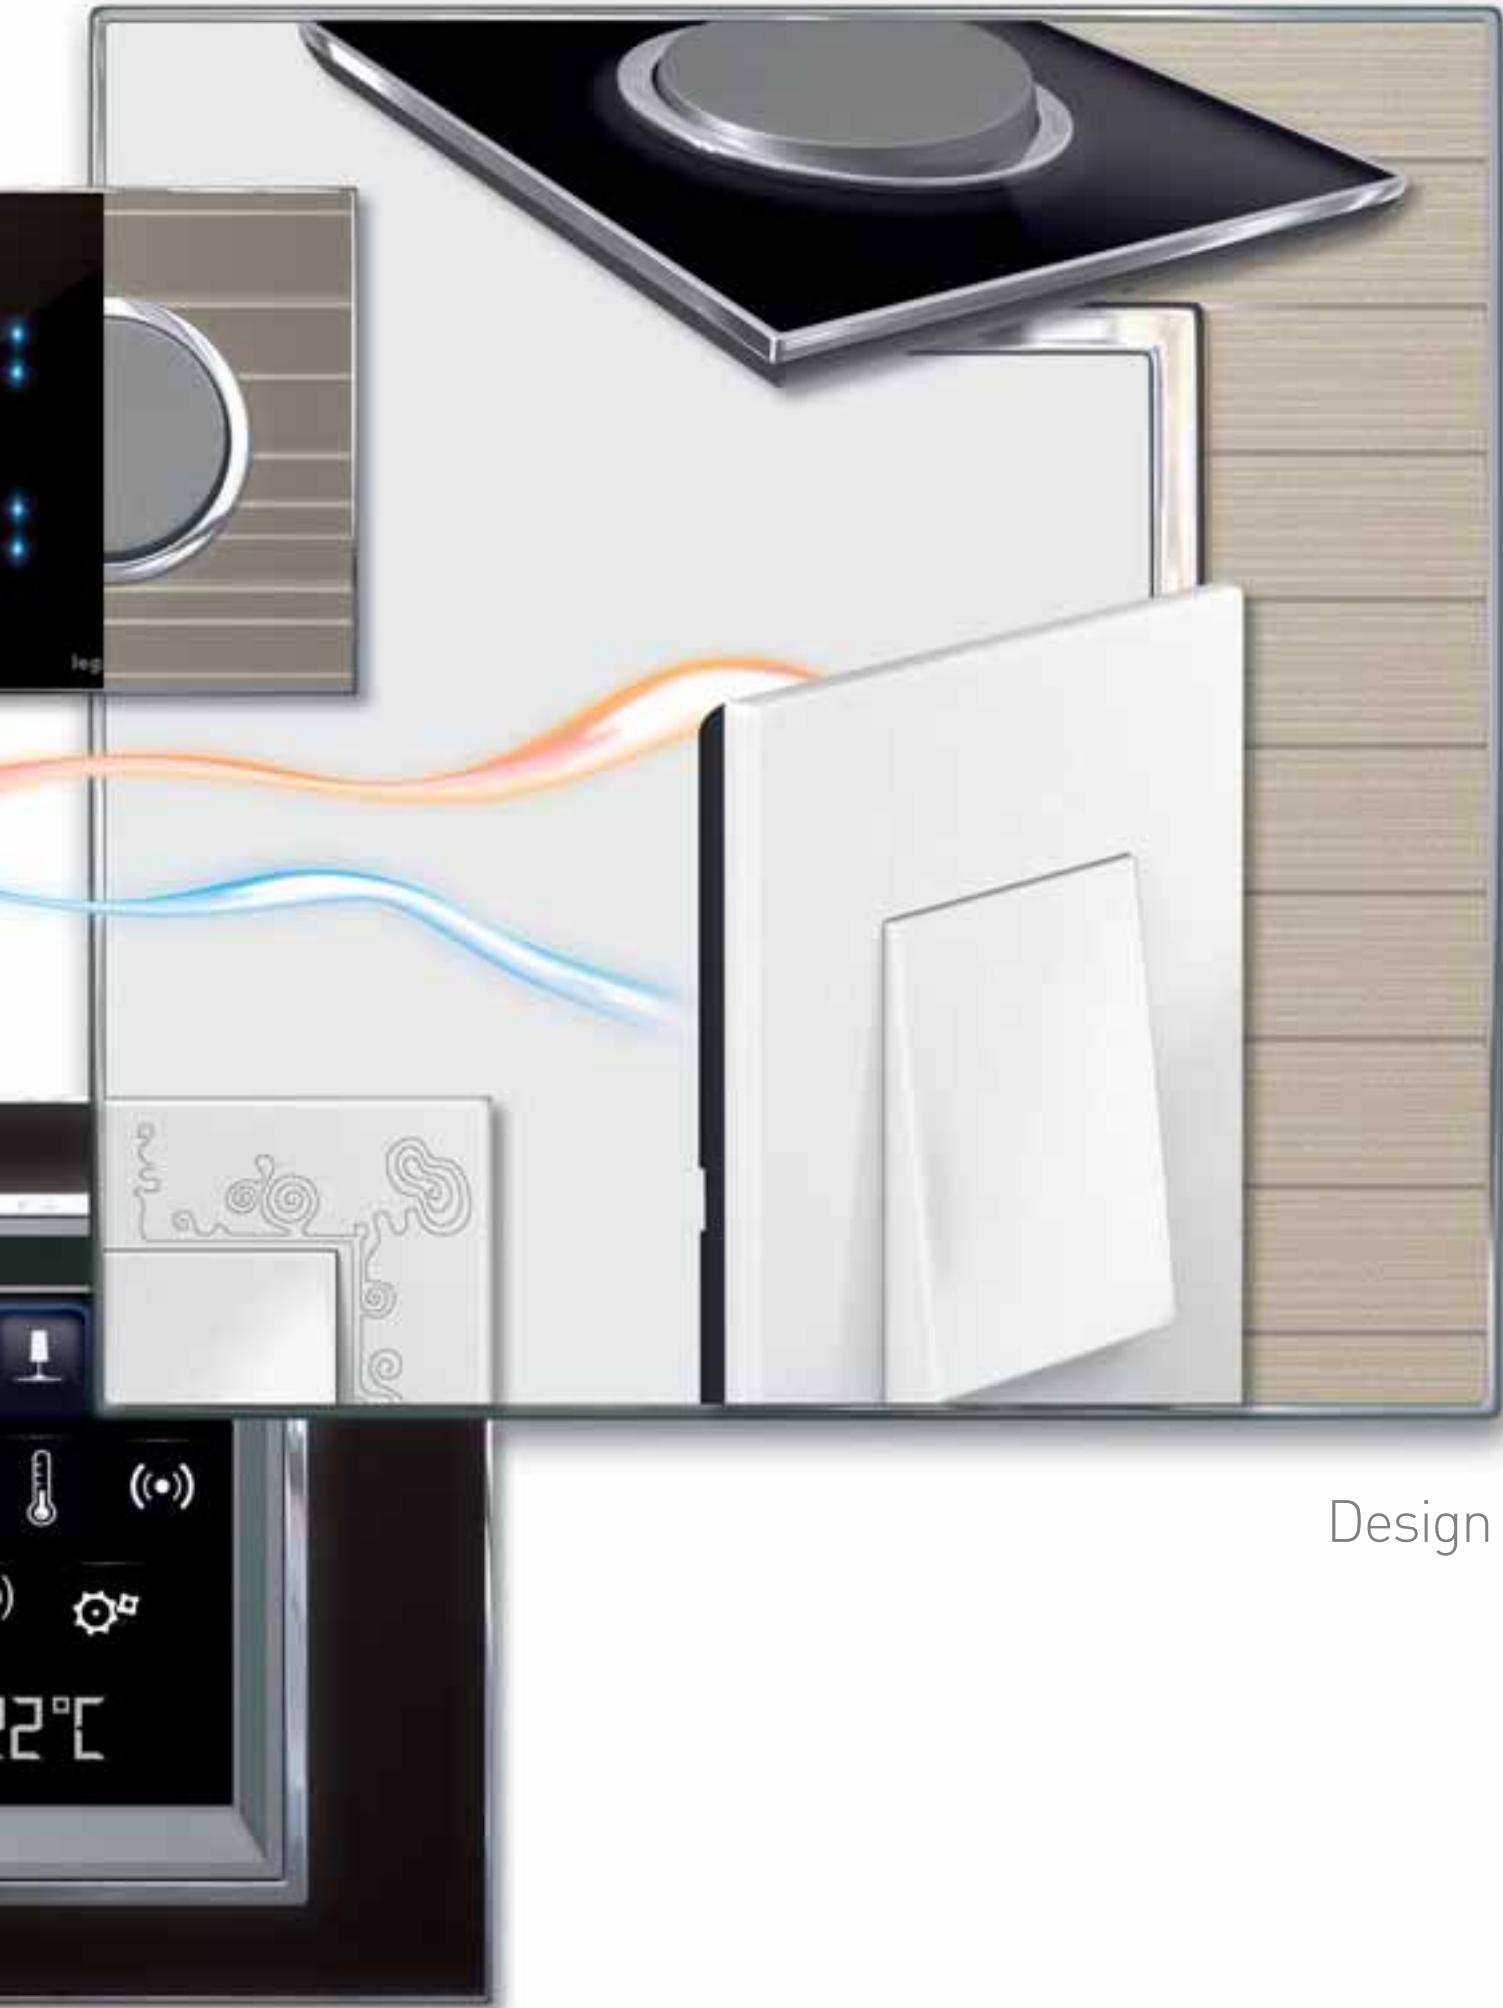

South Africa

Australia

The range provides all types of sockets as per all major standards: Indian, British, US, Italian, German, French, Korean, Chinese, Australian, South African...

Design

Design for a global lifestyle

The timeless design of Arteor™ features clearly hi-tech characteristics understandable anywhere in the world. Minimalist and sober, its carefully crafted design is inspired by the most modern technological devices, such as flat screens and digital photo frames, creating the impression that the product is floating on the wall.

Design options for control functions

Arteor™ offers a wide choice of ergonomics and finishes to satisfy the most demanding customers. All stand-alone control functions are available in two shapes of rockers – round or square – and in two colours – white or magnesium.

14

White

Pearl Alu

TATTOO

Edition 1

16
17

The modernist collection with a cultural touch.
Timeless yet trendy, it adds an individual note
to living environments.

A rich choice of finishes

MIRROR

Mirror Red

Mirror Taupe

Mirror White

Mirror Black

A selection of brilliant mirror finishes combined with metal to enhance the technological character of the range.

GRAPHIC

Formal

Casual

A minimalist style that reinvents the classical 70s, retro with a touch of timeless sophistication.

18

19

A rich choice of finishes

BRUSHED METAL

Authentic metal in cold and warm tones.

This collection suits modern interiors
as well as classic-style environments.

Stainless Steel

Gold Brass

WOOD

Light Oak

Wenge Style

Nature meets technology in a perfect combination of natural materials and metal details.

20
21

A rich choice of finishes

LEATHER

Galuchat

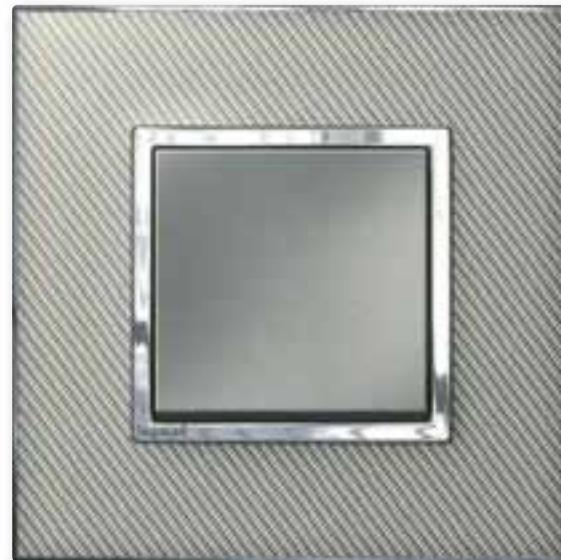

Club

A luxury finish made of high-quality authentic leather, designed for sophisticated environments. Arteor™ is the only range featuring Galuchat: this precious leather makes luxury a living part of interior design.

SIGNATURE

Woven metal, a hi-tech material which requires special processing skills. An extraordinary choice for the most demanding customers.

Woven Metal

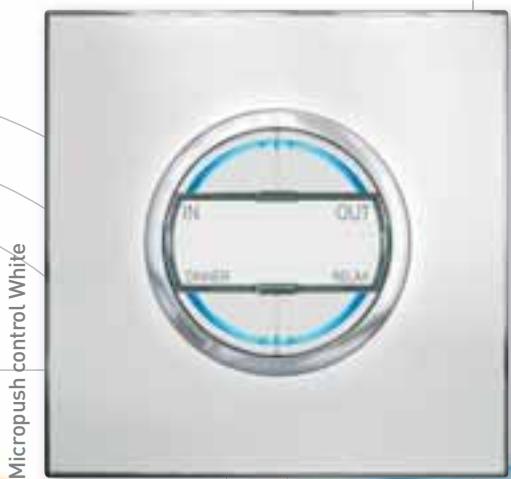

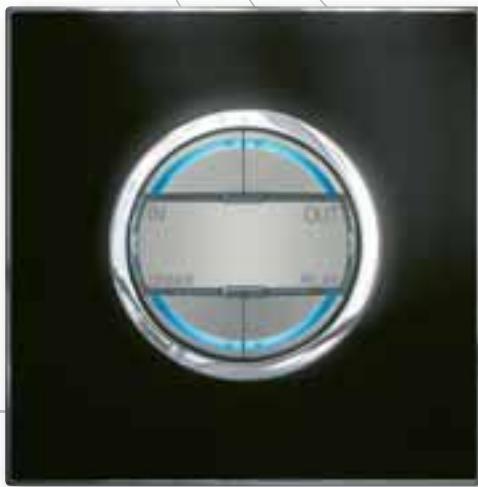

22

23

Design options for home automation

While similar in design to the stand-alone devices
the home automation control functions provide
even more technological features.

Micropush control Magnesium

Touch plate dimmer Black

Touch plate dimmer White

All home automation control functions of the Arteor™ line are available in 2 versions: round micropush version or advanced touch controls.

ooooo

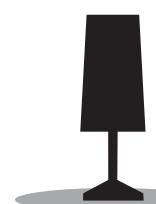

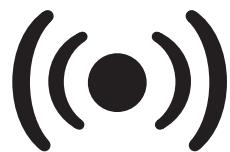

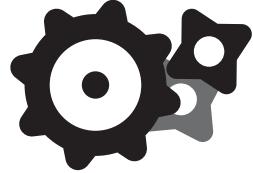

24

25

Graphic user interfaces

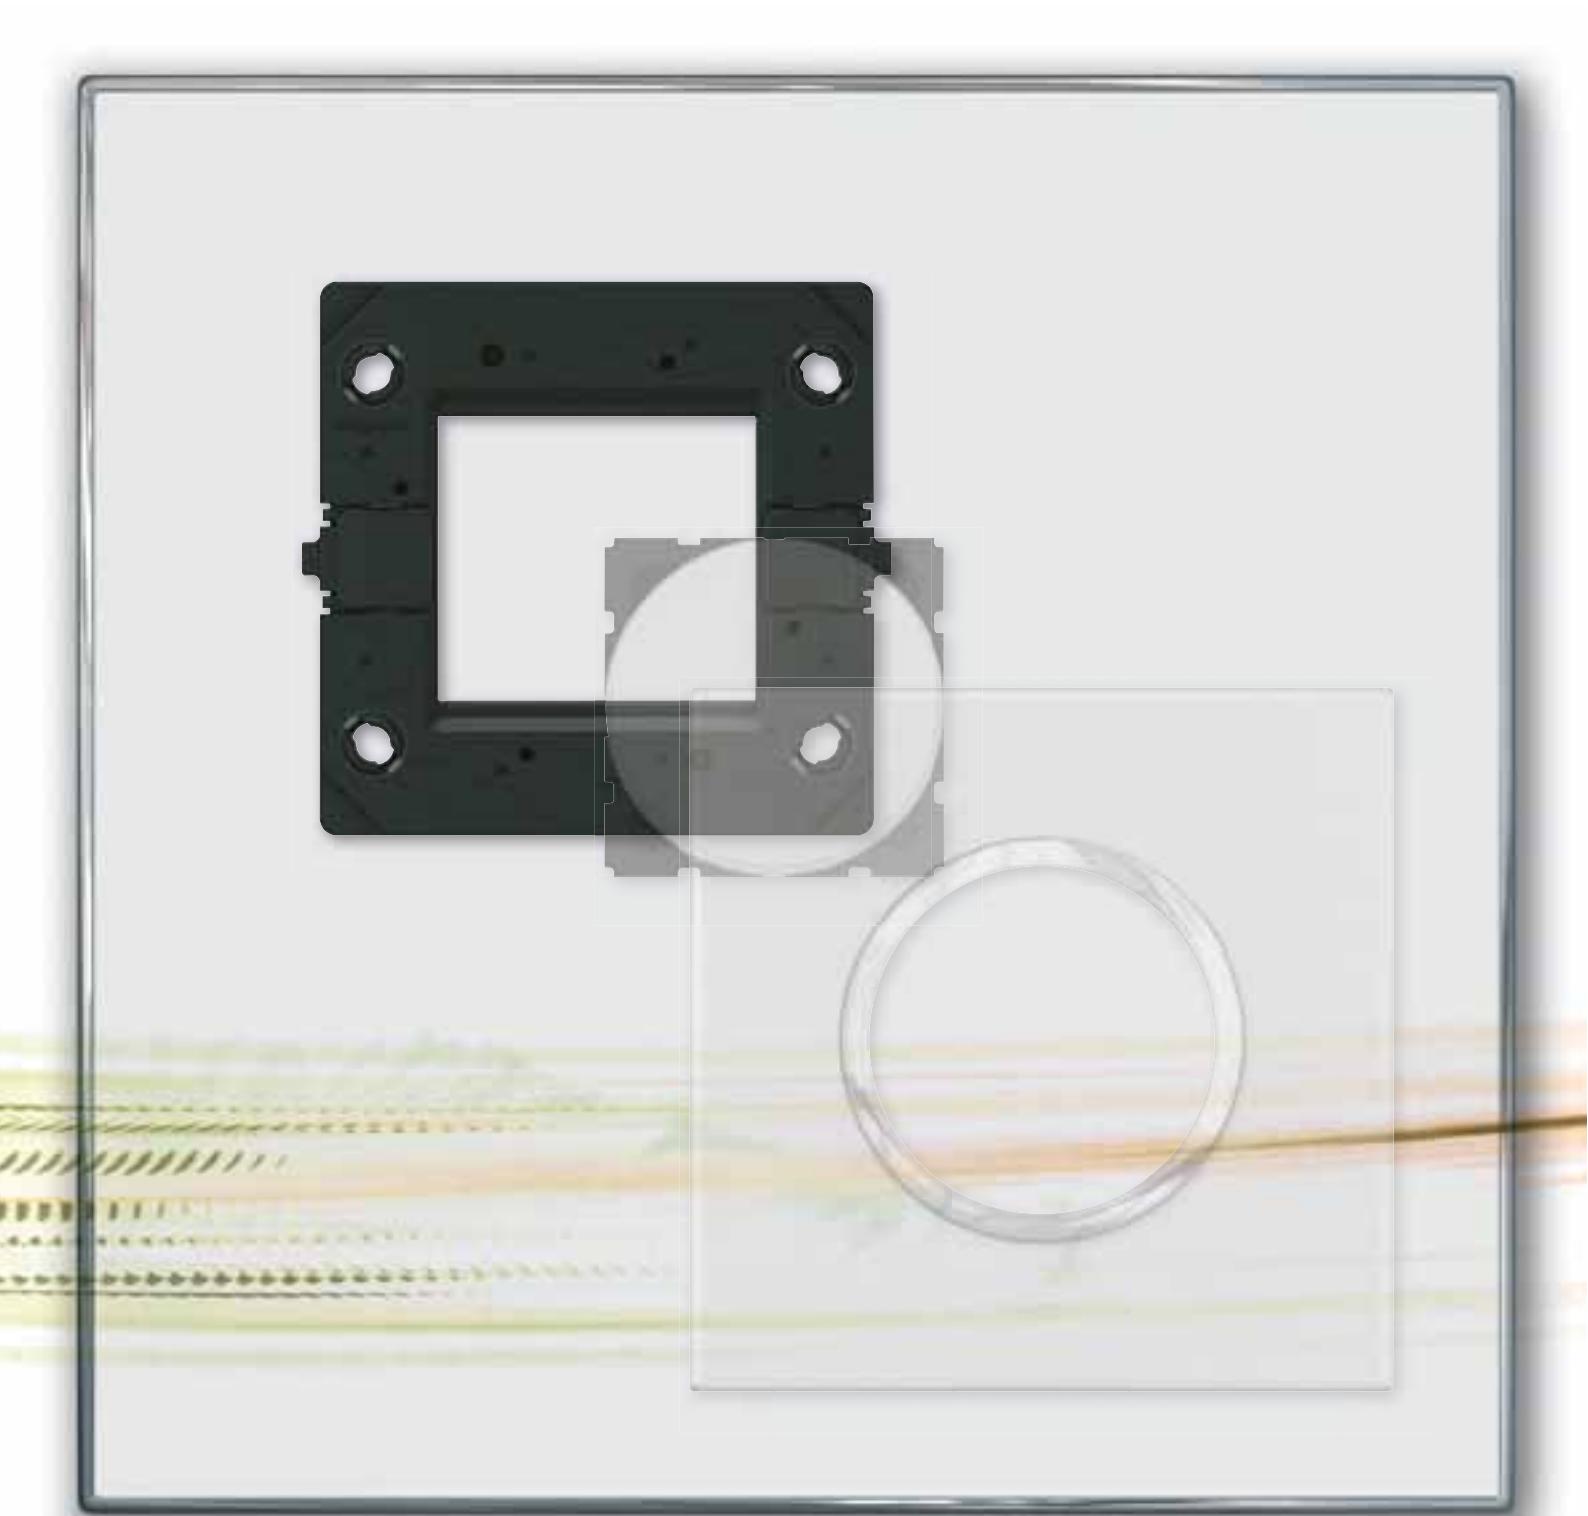

The Arteor™ range offers a wide choice of graphic user interfaces speaking the same “icon language” as modern electronic consumer devices. These clearly designed icons allow the user to browse the different functions of the home automation system in an intuitive way.

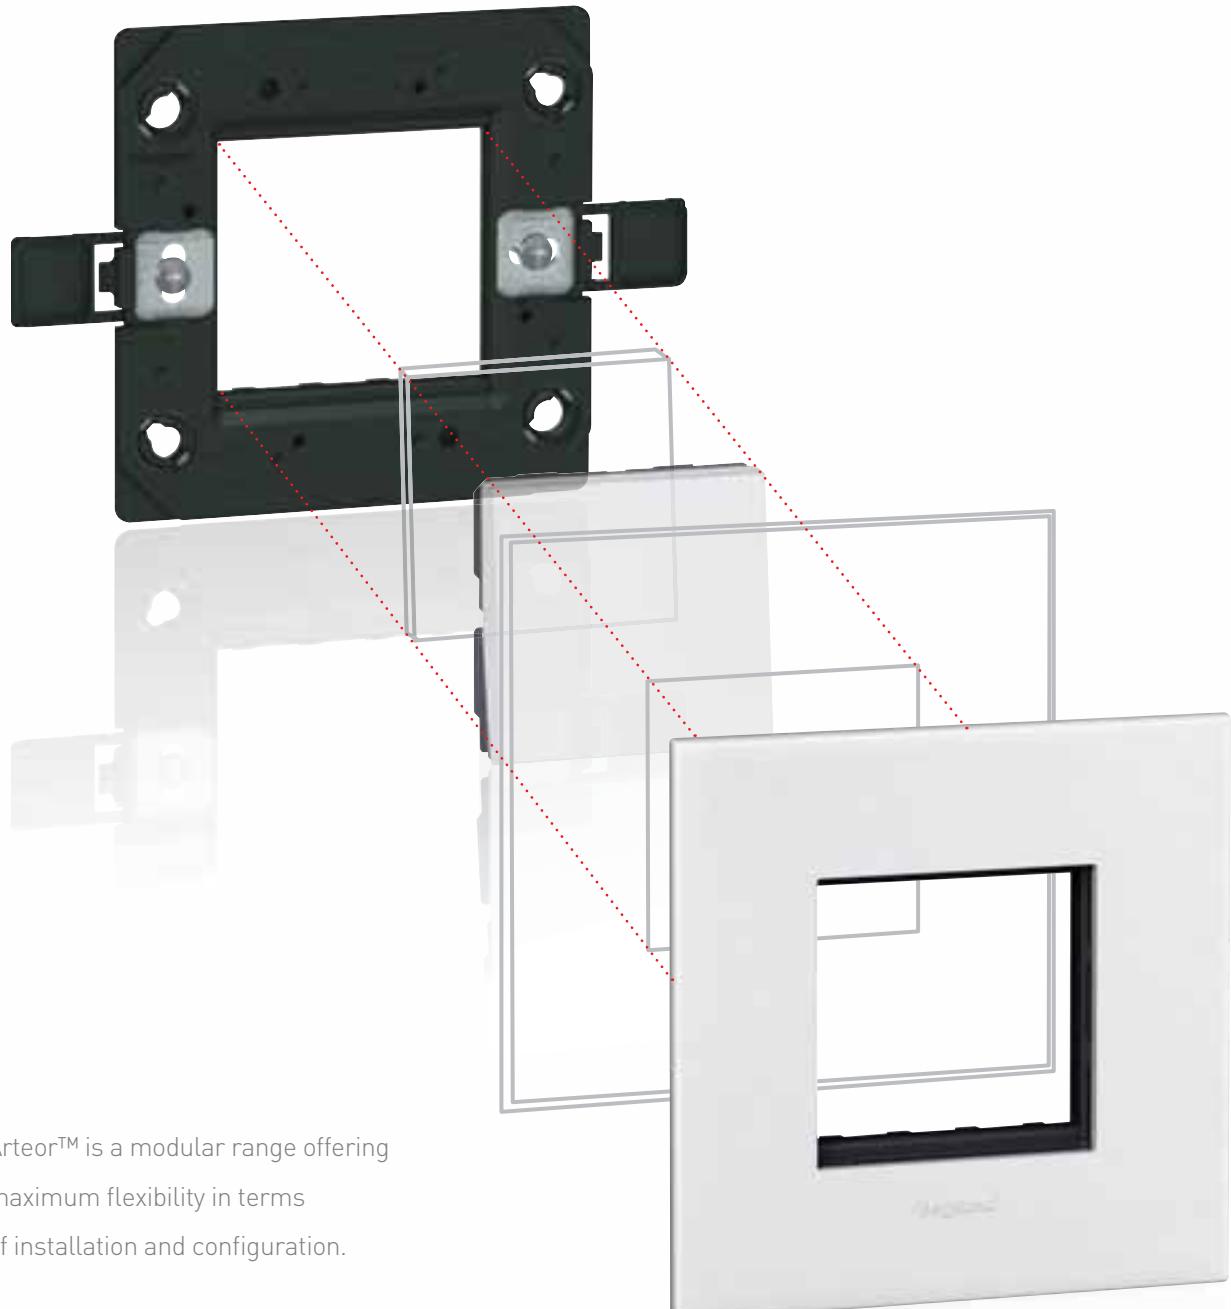

26
27

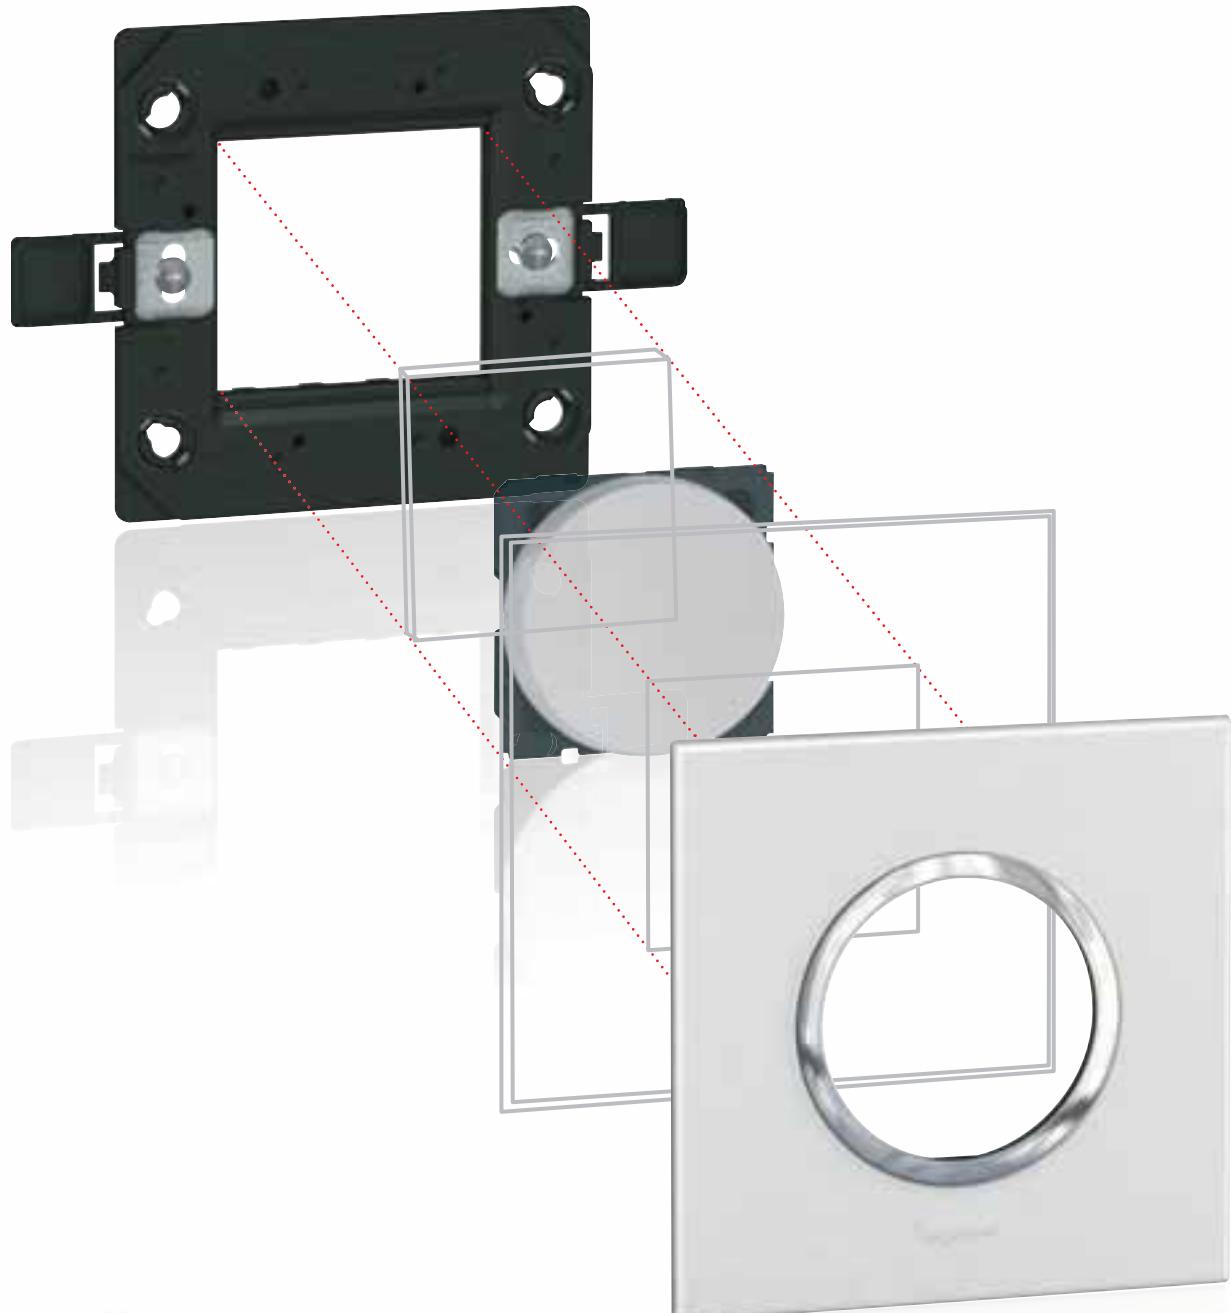

Installation features

Versatility and modularity for unrivalled flexibility

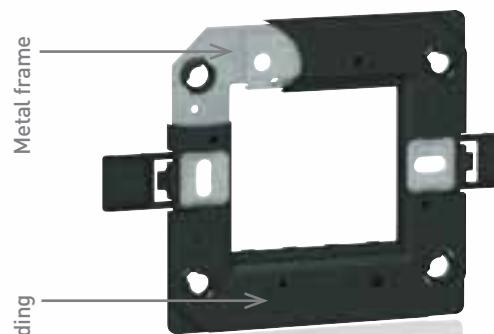

Arteor™ is a modular range offering maximum flexibility in terms of installation and configuration.

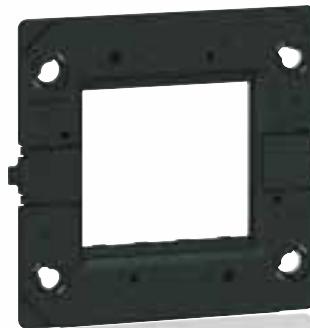

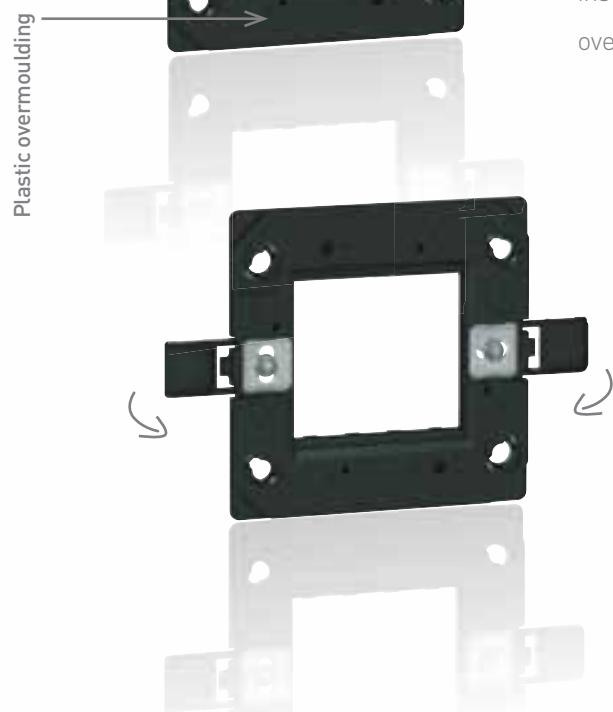

Arteor™ mechanisms are fully compatible with Legrand floor boxes, columns and trunking system.

Installation safety first

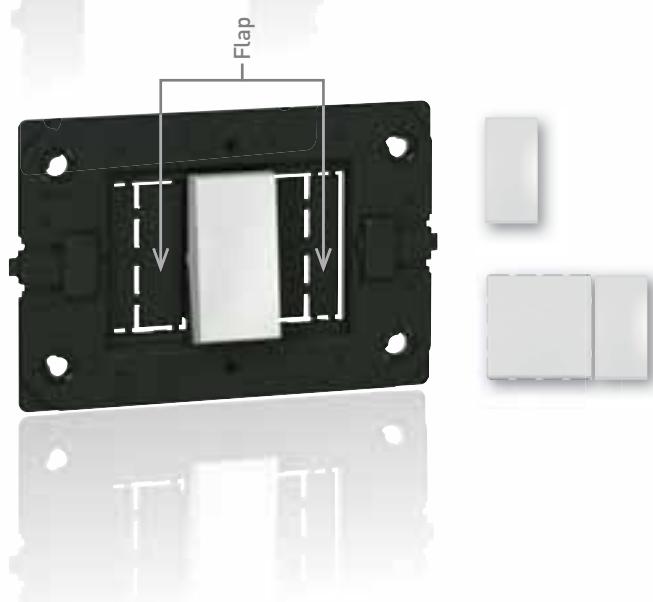

The innovative bi-material support frame provides IP 20 electrical safety. It combines the sturdiness of a metal frame with the insulating qualities of plastic overmoulding.

Screw caps can be closed once the support frame is installed, ensuring total insulation.

Specific to US/Italian standard support frames: flaps ensure safety when only one or two modules are installed on a 3-module support frame. Flaps avoid any contact with the wires (e.g. in case of disinstallation) and can be broken out according to individual needs.

Safety at every step of the installation process

Support frames and plates are each supplied with special protective shells.

This ensures protection of the product against dust and paint.

Full protection - whether only support frame and mechanism are installed...

... or whether the complete product is mounted before completion of site work.

Protective shells should be removed only once site work is fully completed.

32

33

ARTÉGOR

Home Automation

Home automation general features

MY HOME
legrand

The answer for all home automation requirements,
from a single function to global integrated solutions.
My Home Legrand supports 2 technologies :
Radio using ZigBee® protocol and BUS using SCS protocol.

36

37

This comprehensive and versatile home automation solution, which is integrated to the Arteor™ line will satisfy your most demanding customers' needs

One solution, two technologies, endless possibilities

Centralization, integration, communication and multimedia

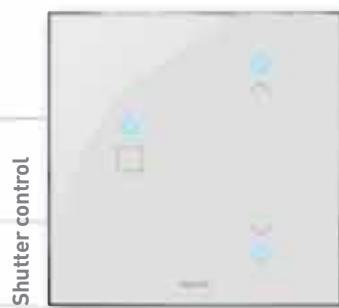

Comfort
Lighting management

Remote management

Comfort

38

39

The system works through
two different media:

- Radio using ZigBee® protocol
- BUS using SCS protocol

Products have been developed
to ensure perfect interoperability and
maximum reliability of the system

Arteor™ home automation
installations offer a high level of
flexibility.

Radio offer

the easy way to home automation

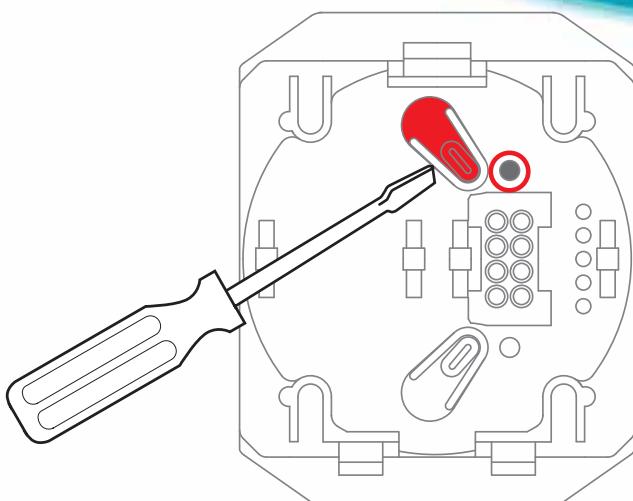

"Plug & Play" - no special wiring

The radio solutions based on the ZigBee®* protocol uses the existing electrical infrastructure without any special wiring.

"Push & Learn" configuration

The products can be easily configured directly on the device itself by the "push and learn principle". No specific software needed.

* ZigBee® Certified Product - Manufacturer Specific Profile

When to use it

It is the ideal choice:

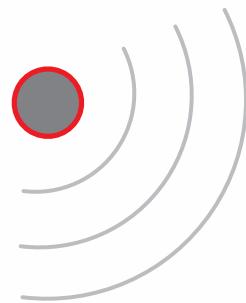

- If you want to upgrade your conventional electrical installation to a home automation system
- When an extension is needed on an existing home automation system

(e.g. you just want to add a control point to an existing installation)

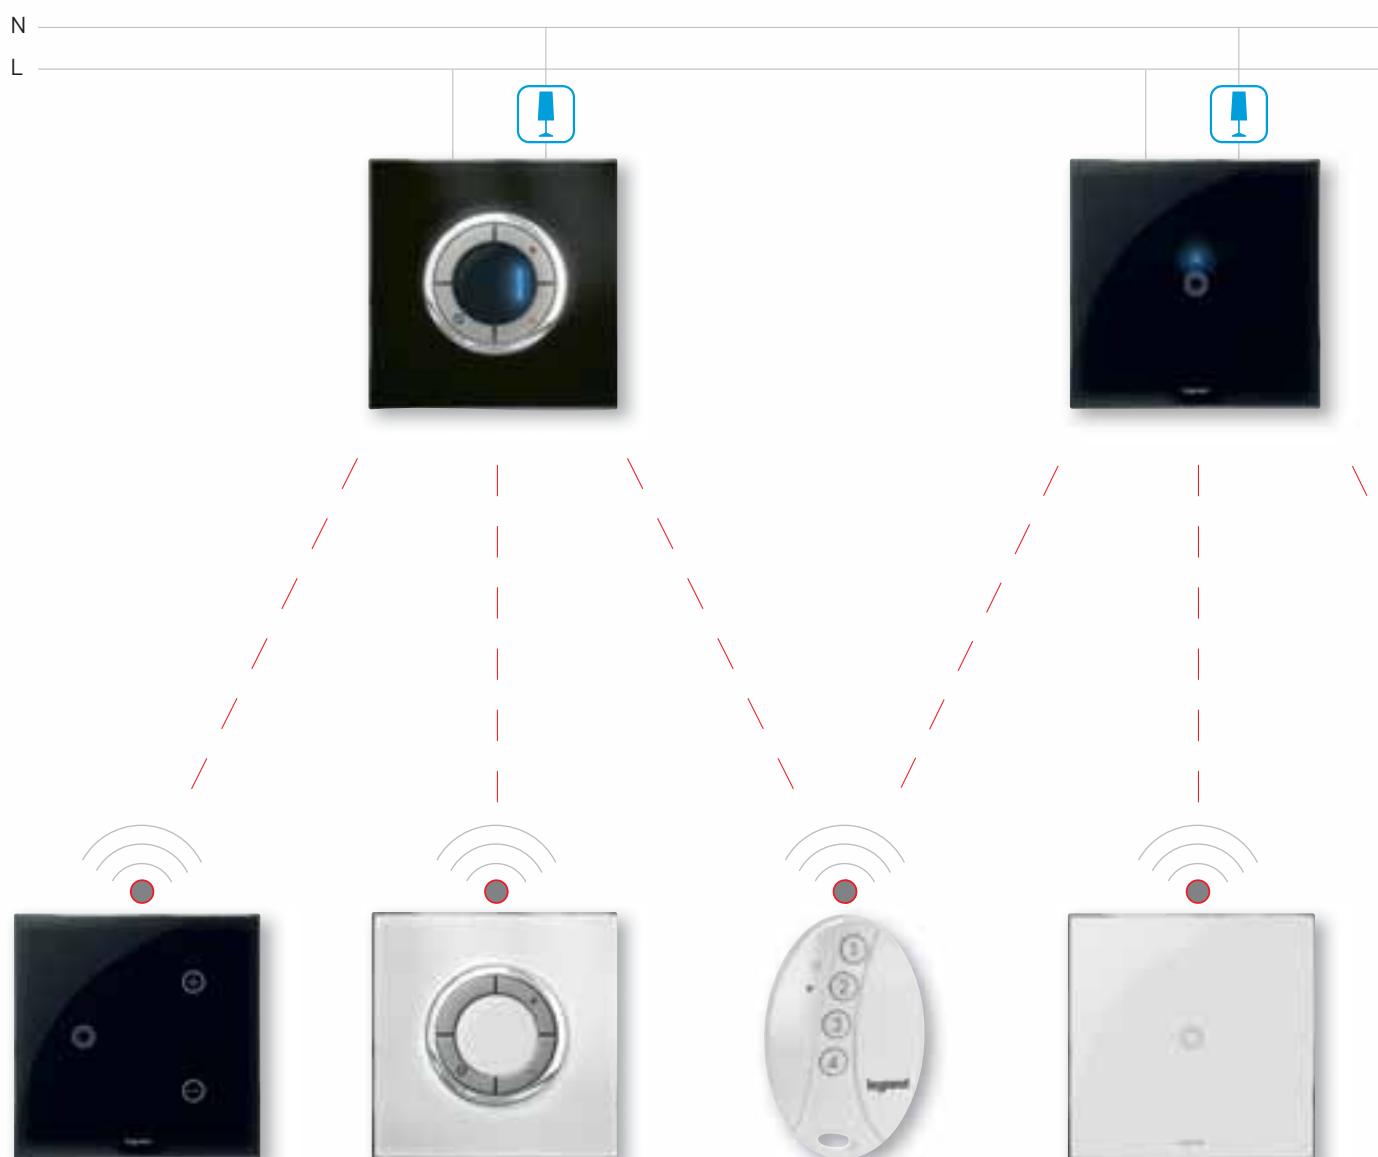

- If it is not possible to make changes on the electrical installation and no recabling is allowed (e.g. renovation)
- For less complex new installations.

_Radio offer

_Principle of Radio automation

Remote management of receivers is ensured by battery-powered surface-mounted transmitters.

Radio devices can fall into two categories:

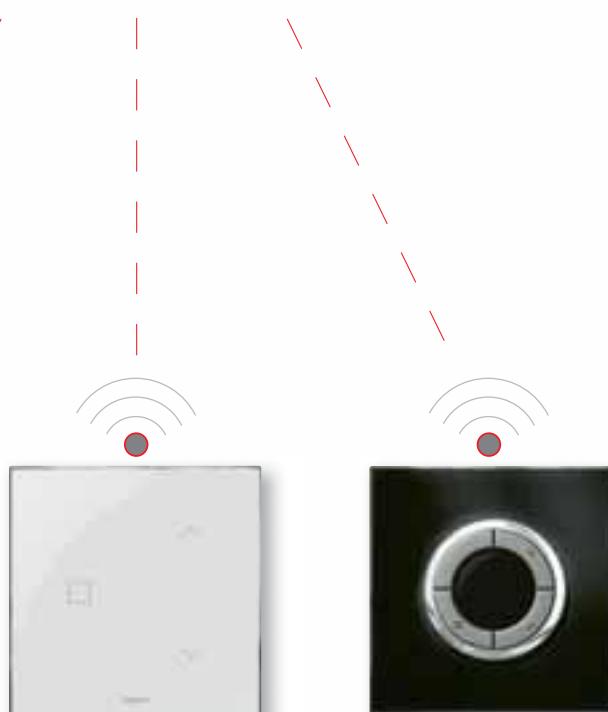

- Actuators (transceivers) which are connected to the load and to the mains supply
- Controls (transmitters) powered by battery

Flush-mounted receivers
control loads

42

43

The ZigBee® Protocol

Recognized worldwide

The ZigBee® protocol has been developed by an alliance of many international players.

This new radio transmission protocol is based on the IEEE 802.15.4 wireless personal area network standard. It works on the 2.4GHz frequency which can be used throughout the world. This means Arteor™ home automation solutions can be installed anywhere in the world.

ZigBee® based radio solutions* are even suitable for complex installations, they ensure high performance and excellent reliability.

* ZigBee® Certified Product - Manufacturer Specific Profile

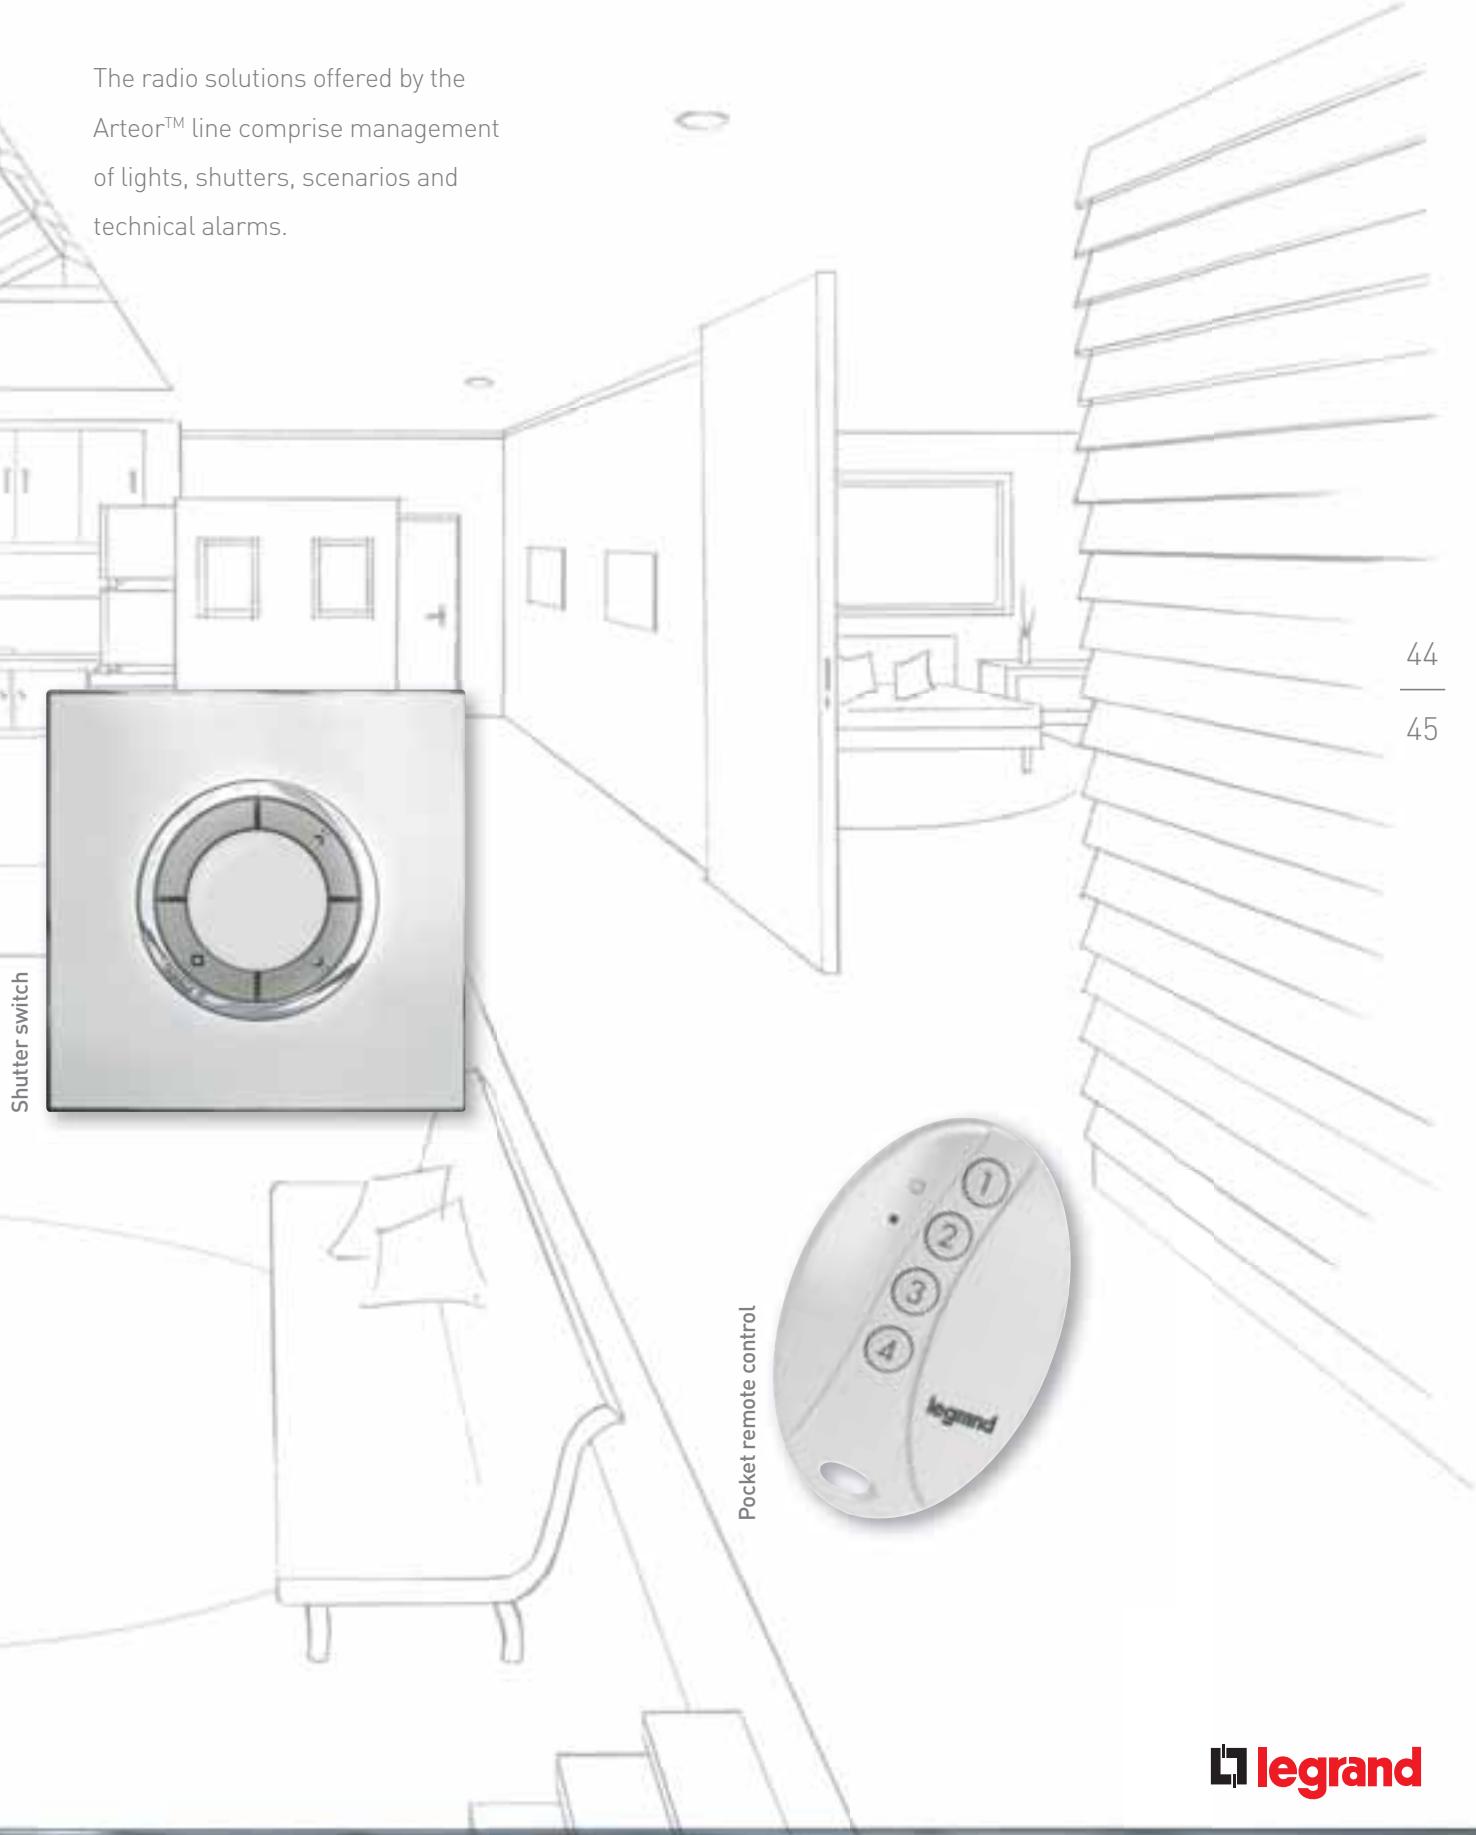

4-scenario touch plate

Radio Offer: functions

The radio solutions offered by the Arteor™ line comprise management of lights, shutters, scenarios and technical alarms.

Bus offer

2-wire BUS technology

The Legrand BUS offer is based on 2-wire BUS working on the private SCS protocol.

Radio extension

The BUS system can be extended with Arteor™ radio solutions through the SCS/ZigBee® gateway

When to use it

Ideal for new installations, the BUS system integrates different applications – such as comfort, safety, energy saving functions, door entry systems, management of multimedia contents, remote supervision and control – offering fully networked solutions.

Open to Third Party solutions

- The BUS system guarantees integration with DALI and KNX through dedicated gateways.
- Interoperability between this Legrand system and third party home automation systems can be achieved through the OpenWebNet protocol.

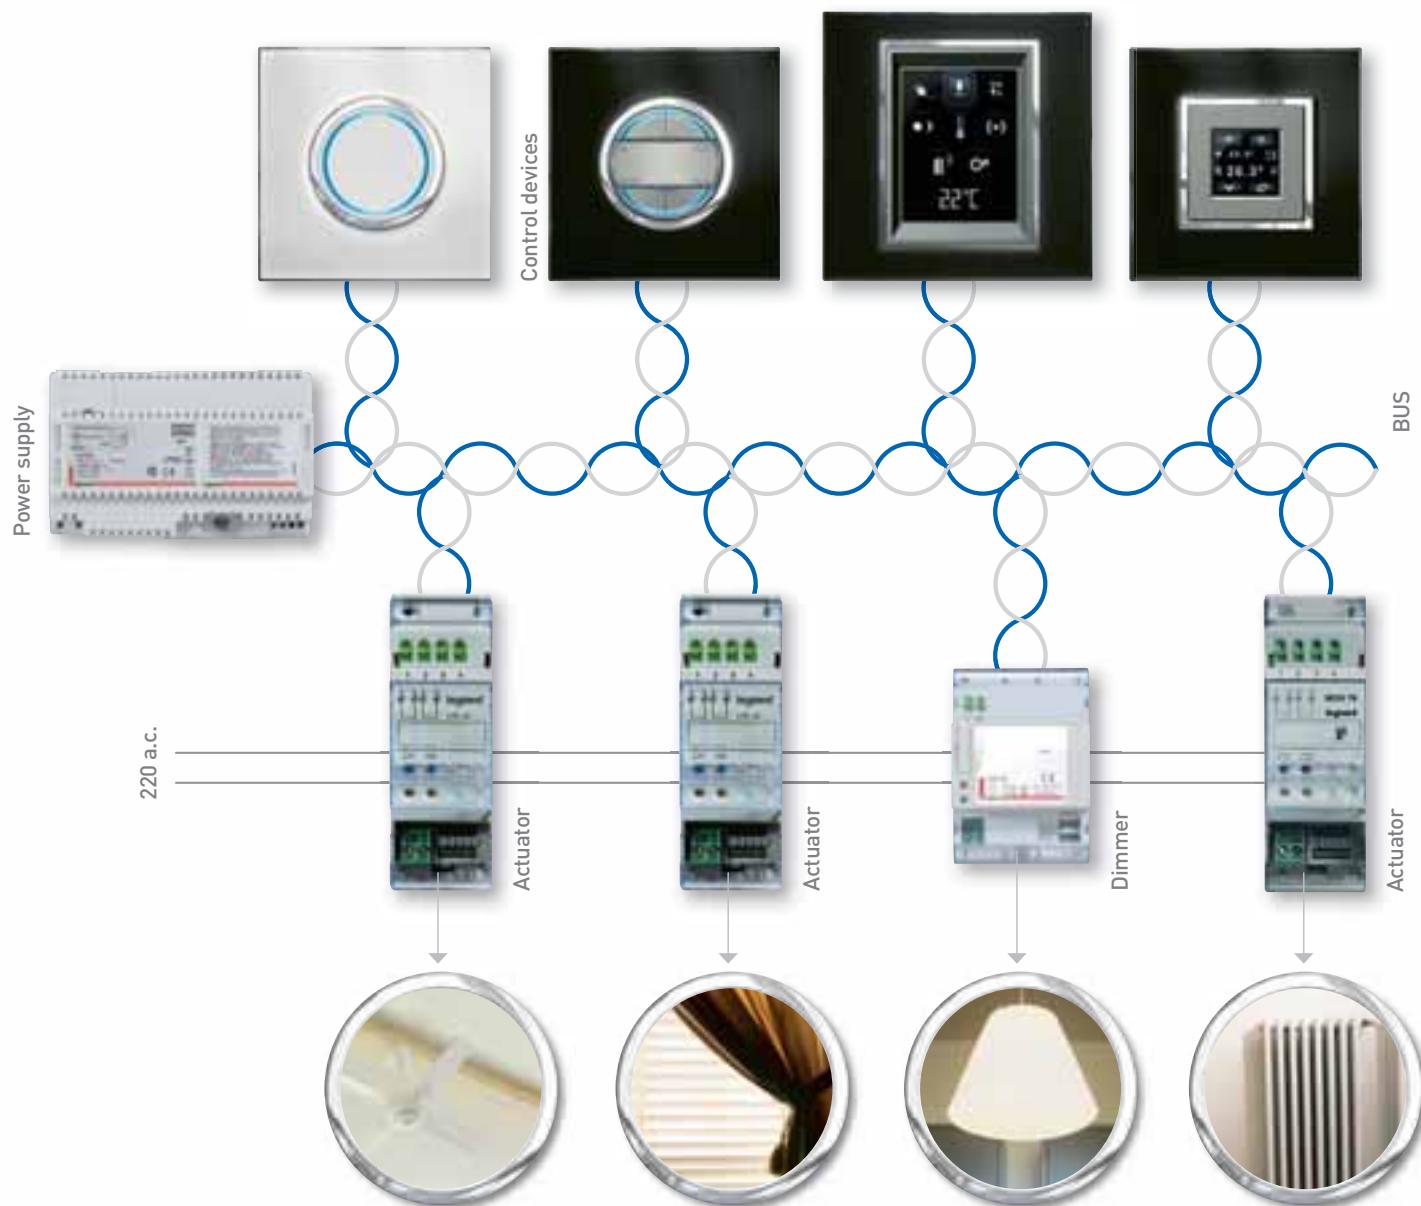

46

47

2-wire BUS offer: SCS

All devices are connected in parallel to the BUS, which is a cable with twisted pairs.

The functions associated to each product depend on the given configuration.

_Configuration

Easy configuration

The product can be configured using physical configurators on the product itself or through virtual configuration via computer.

Description of the configurator housing

Configurator housing

Numbered configurator

48

49

_Centralized architecture

The system is composed of actuators and control devices.

Actuators which control the loads are connected to the BUS and to the power line. They are DIN module devices centralized on the electrical

panel board.

Control devices transmit information to actuators through the BUS line.

They are installed in every room.

Innovation in functions

A new generation of dimmers

Arteor™ features complete solutions for modern lighting management, from entry level for a single load to top dimmers for demanding applications. Innovative solutions

are available in stand-alone version, BUS and radio technology.

Leading/trailing edge Dimmer 600W

Available in stand-alone and radio version

Universal Dimmer 300W

Suitable for all kinds of loads including compact fluorescent lamps and LEDs.
Available in stand-alone and radio version

Leading/trailing edge Dimmer 2x400 W

DIN rail mounting, BUS version

Universal Dimmer 300W

with touch plate

Suitable for all kinds of loads including compact fluorescent lamps and LEDs.
Available in radio version

Dimmer for ballasts 0-10V

Available in stand-alone and radio version. Also in BUS version for DIN rail mounting

Leading/trailing edge Dimmer 2x400 W

Stand-alone version

52

53

Arteor™ offers:

- A new generation of dimmers for traditional loads: incandescent, halogen, transformers
- An innovative range of dimmers for new loads such as LEDs and compact fluorescent lamps
- Multioutput dimmers

Stand-alone solutions for modern living: Comfort

Micropush switch

Electronic micropush switch

Sensitive switch

Allows to control light sources by simply passing the hand in front of it

Universal Dimmer

Suitable for all kinds of loads including compact fluorescent lamps and LEDs

Energy saving

Automatic switch

For automatic lighting control

Electronic room thermostat

For active temperature management

Safety

Gas detector

Indicates presence of gas via LED and audible alarm

Skirting light with detector

Detects a passing person and lights obstacles automatically

Time delay switch

For timer control of a circuit

Arteor™ innovative solutions for modern living enhance comfort, help save energy and ensure greater safety. Motion sensitive and automatic switches, dimmers for modern, low consumption light sources

such as compact fluorescent lamps and LEDs, electronic room thermostats, technical alarms – the range offers a great variety of functions that meet all the requirements of modern installations.

_Focus on stand-alone office solutions: _lighting control

From specific products for adaptable or automatic control of lighting via solutions for access control right through to a wide variety of data, audio and video sockets: Arteor™ contributes to make office buildings operate in a way that is functionally optimal and energy efficient at once.

— access to data

RJ45

Arteor™ lighting environment controller

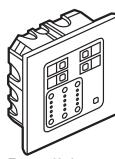

5740 60

Loads selection chart (p. 70)

Pack	Cat.Nos
1/4	White Magnesium 5740 10 ⁽¹⁾ 5740 60 ⁽²⁾

Lighting environment controller

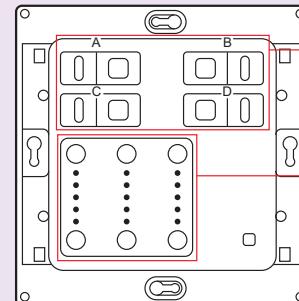

Main controller
3 x 1000 W
Particularly suitable
for controlling lighting
environments in conference
rooms, meeting rooms,
restaurants, showrooms, etc.

Possible applications:
- control of 3 lighting circuits in one room
- control of lighting environments by
dimming polychromatic lamps (red/green/
blue or warm white / cold white)
Sources supported per circuit:
- 1000 W for incandescent and halogen
230 V~,
- 1000 VA for fluorescent tubes with 0-10 V
ballast,
- 1000 VA for ELV halogen lamps with
ferromagnetic or electronic transformer
The cumulative load of the 3 circuits must
not exceed 2200 W
DALI input ballast and 0-10 V ballasts can
be controlled
Controls on front face:
- 6 push-buttons for on/off/dimming control
of each of the 3 lighting circuits
- 3 sets of 5 LEDs displaying the current
level of each circuit
- 4 push-buttons for memorisation and
control of lighting environments

(1) Supplied with White plate
(2) Supplied with Mirror Black plate

Arteor™ lighting environment controller

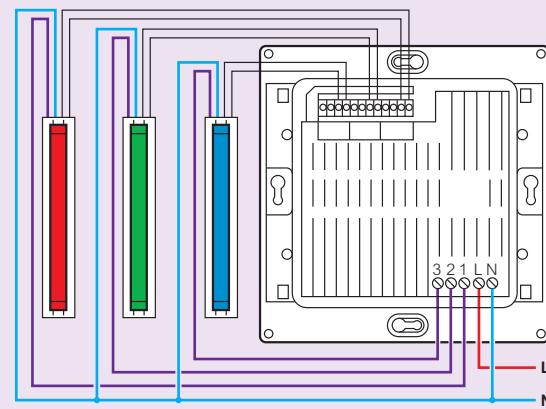

■ Lighting environment controller

Choice of scenes:
(factory configuration)
A: 100 % C: OFF
B: 66 % D: 33 %

Manual setting on each of 3
channels:
light dimming / switching ON/OFF

Wiring principle With 0-10 V ballasts

By controlling the RGB proportions, you can create scenes favouring
warm or cold colours or scenes with dominant colours

The possibilities and results are identical using LED (lights) piloted by
0-10 V ballast

Possibility to mix channels with different types of lamps
(example: 1 channel for 0-10 V ballast, 2 channels with incandescent
lamp dimmer)

■ Electronic switches, dimmers, lighting environment controller max. loads

Wi-Fi access point

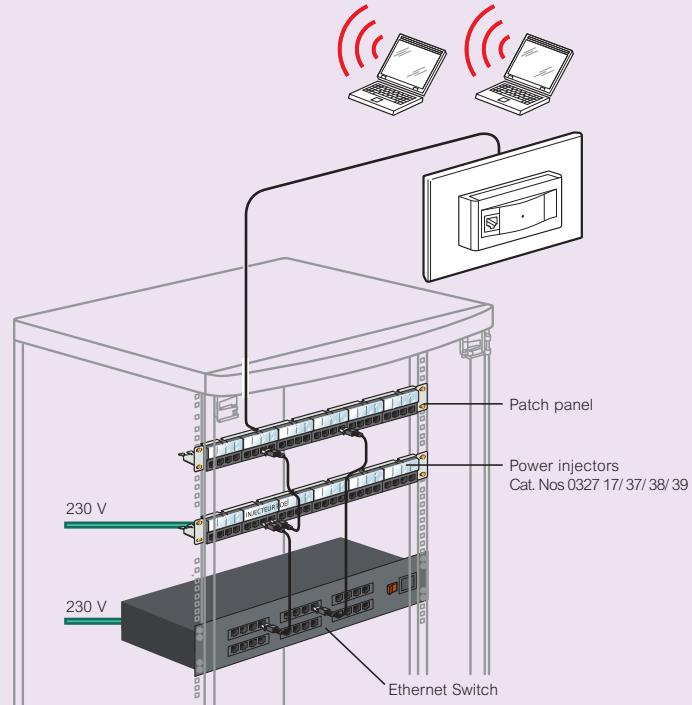

Come in addition to a new or existing LCS structured cabling, to meet the requirements for mobility in the building (meeting rooms for example)
 Identical connection to the LCS RJ 45 socket
 Remote management via a web interface
 Allow the configuration and the exploitation of the Wi-Fi access point by the network administrator. Security via WPA2 encryption (802.11i) and/or authentication (802.11x)
 Guest access to offer free access to the guests and keep independent and secure the main Wi-Fi network
 Supply via Power over Ethernet (standard 802.3 af)
 4 modules 90 x 45 mm

1/10 5723 76 5728 76 Standards 802.11a and 802.11b/g dual-band dual-radio
 Data rate: 54 Mbps max. on each frequency (802.11a and 802.11g)
 Equipped with an RJ 45 socket on the front panel

1/10 5723 77 5728 77 Standards 802.11a and 802.11b/g dual-band dual-radio
 Data rate: 54 Mbps max. on each frequency (802.11a and 802.11g)
 Standard 802.11 b/g
 Data rate: 54 Mbps max.

Arteor™ Ethernet switches, Wi-Fi access points

■ Installation principle

■ Arteor Wi-Fi access points

A 802.11 a and b/g solution

Radio communication standard	802.11 b/g	802.11 a
Power over Ethernet standard	802.3 af	
Frequency band	between 2.40 and 2.48 GHz	5 GHz
Number of available channels	13	8
Max. data rate	54 Mbps	54 Mbps

■ Advantages of a Legrand Wi-Fi access point

- Possibility of simultaneous operation on 2 frequencies, a and b/g
- Provides a max. data rate of up to 2 x 54 Mbps in simultaneous mode
- Very high security level: encryption (WPA2 - 802.11i) and authentication (802.1x)
- Possibility of roaming (moving from one access point to another without breaking the link)
- Quality of service (priority automatically given to voice, then video and finally data) in accordance with standard 802.11e
- Easy to configure and make secure with the quick configuration node

NEW: Guest access to offer a free access for the guest and keep independent and secure the main Wi-Fi network

■ Installation

In all supports that can take an Arteor mechanism (ducting, columns, flush-mounting boxes, floor boxes, etc)
 Do not place access points behind an obstacle that would limit the radiation of the antenna
 Access points are connected in the same way as RJ 45 sockets

■ Sizing

- Provide 1 access point for 1 localised requirement
- Provide 1 access point per 100 m² for global coverage and a maximum gross speed
- Provide 1 access point with an RJ 45 socket for an office used by visitors

■ Legrand services

To guide you in setting up your VDI sites:

- Help with sizing the installation
- On site assistance for integrating products and making important installations secure

Arteor™ HD 15 amplifier + Jack kit, equipment cords

0779 30

Cover plates selection chart (p. 118 to 119)

Pack Cat.Nos HD 15 amplifier + Jack kit

Pack	White	Magnesium
1	5723 70	5728 70

Used to connect audio/video terminals at a distance of more than 20 m
The video link is via an HD 15 connector (resolution up to UXGA), and the audio link via a 3.5 mm jack
Comprises:
- One 4-module Arteor transmitter supplied with cover plate equipped with an HD 15 connector and a 3.5 mm jack
- One 4-module Arteor receiver equipped with an HD 15 connector and a 3.5 mm jack
- One 4-module Arteor power supply to be connected on the mains then linked to the receiver
The transmitter and receiver are supplied with an RJ 45 LCS jack for tool-free connection
The link between the transmitter and receiver is via a network cable (Cat.No 0327 56) (consult us)

Equipment cords

For connecting a socket to a terminal

HDMI cord

Length 10 m
For connecting an HDMI socket to the audio/video terminal (plasma screen, DVD drive, Home Cinema, games console, etc)
For use at more than 10 m, use the HDMI Booster Cat.No 0779 30

HD 15 cord + 3.5 mm Jack cord

Length 2 m
For connecting an HD 15 video socket and a 3.5 mm audio jack to a terminal (PC, video projector)

HDMI booster

Used to extend an HDMI connection
Consists of 2 female connectors and used as an addition to the HDMI cord (for example cord Cat.No 0517 20)
Does not need an external power supply

Cables

For connecting 2 sockets

HDMI cable

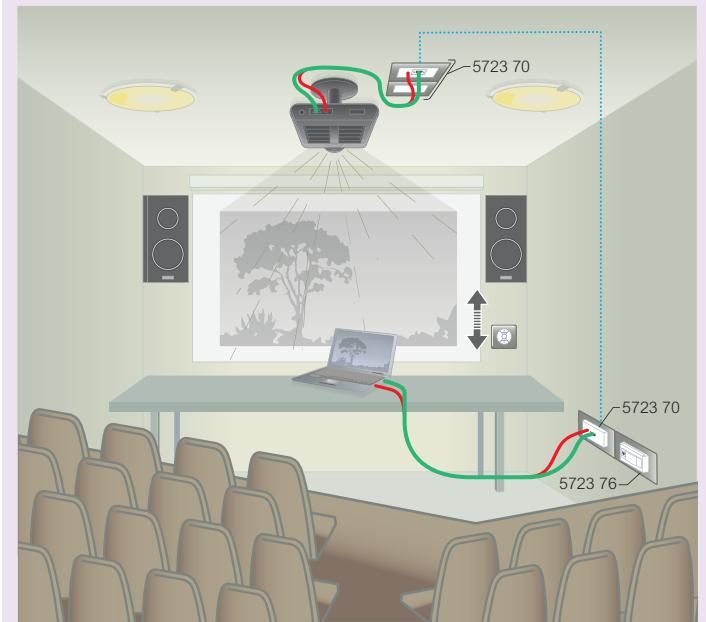

Length 20 m
For connecting HDMI sockets at a distance of up to 10 m

VGA cable

Length 20 m
For connecting full pin HD 15 sockets at a distance of up to 20 m

Arteor™ audio and video sockets

Light dimmer

Cat. no. 5734 62, 5736 62

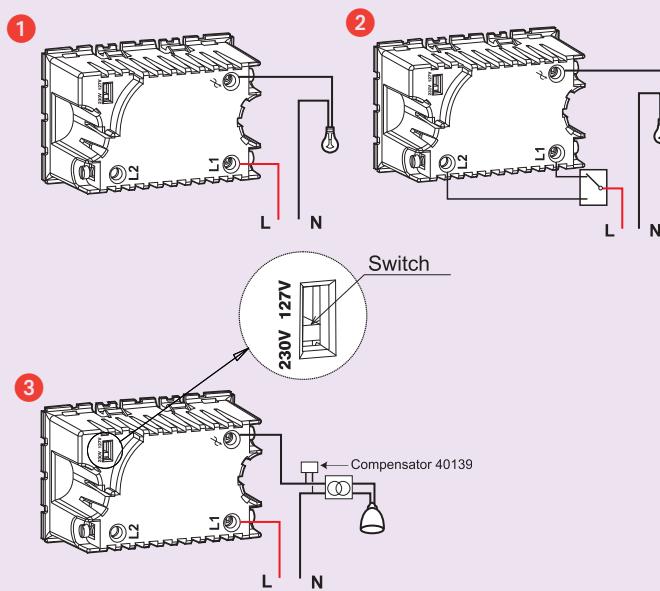

Rotary Dimmer

Cat. no. 5722 40 / 5727 40, 5735 01 / 5737 01

Wiring

- 1 way connection (sketch 1)
- Double-way connection (sketch 2)
- In extra low voltage halogen with ferromagnetic transfers (sketch 3)

Important : There is a switch of rated voltage on the upper right corner of the base and it is set on the position 230V, when the rated voltage is 127V, the switch should be set on the position 127V

Arteor™ automatic switches, single pole latching relays

■ Technical data

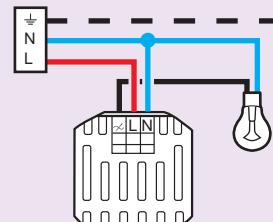

Automatic switches

Cat. no. 5720 52 / 53, 5740 61 / 62

Connection

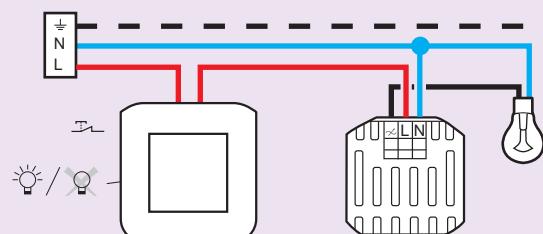

terminal type: Cage-type connector
Terminal capacity: 2 x 1.5 mm² or 1 x 2.5 mm²
Screwdriver: Flat-blade 3.5 mm

Mounting with a switch

Connect the neutral on Cat. no. 5720 53 / 5740 61

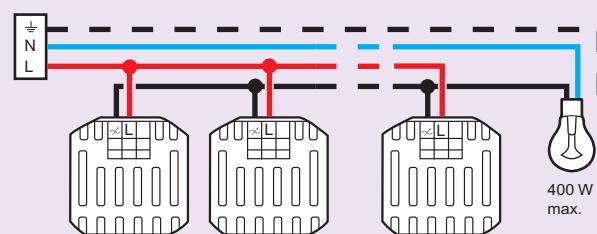

Mounting with offset pushbutton (closing-type):

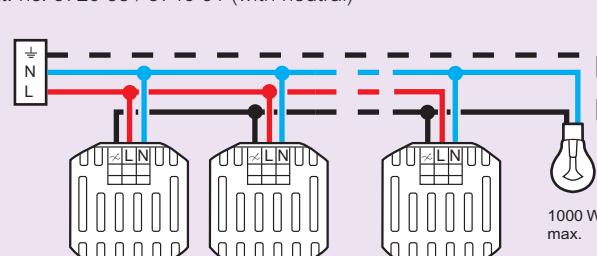

Connect the neutral on Cat. no. 5720 53 / 5740 61.

Mounting with several combined switches:

Cat. Nos. 5720 52 / 5740 62 (without neutral)

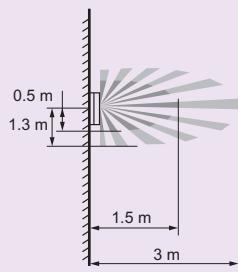

Only possible with incandescent loads.
Comply with the minimum load: 40 W multiplied by the number of inputs.
Comply with the maximum load: 400 W
Cat. no. 5720 53 / 5740 61 (with neutral)

ZigBee®* radio technology

The standard for radio (wireless) solutions, ideal for refurbishment, small new installations and increasing the number of control points, without damaging the walls.

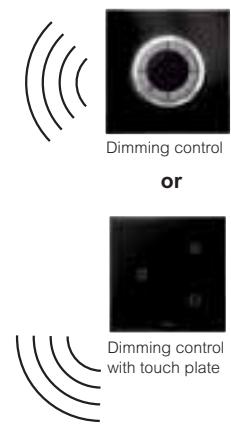

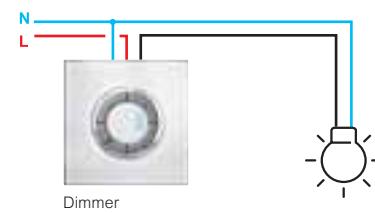

INTERACTIVITY OF FUNCTIONS

ZigBee® radio technology is an international low consumption radio communication standard. Operating at a frequency of 2.4 GHz, it can be used, via transmitters (wireless) and receivers, to control lighting,

roller blinds, as well as technical alarms. It can also control scenarios, and allows bidirectional communication between devices. It can be used in addition to the BUS system.

WIRING DIAGRAM

► LIGHTING CONTROL

RECEIVER DIMMER SWITCH
(See p. 124)
Indicates the light intensity via LEDs

► SCENARIO CONTROL

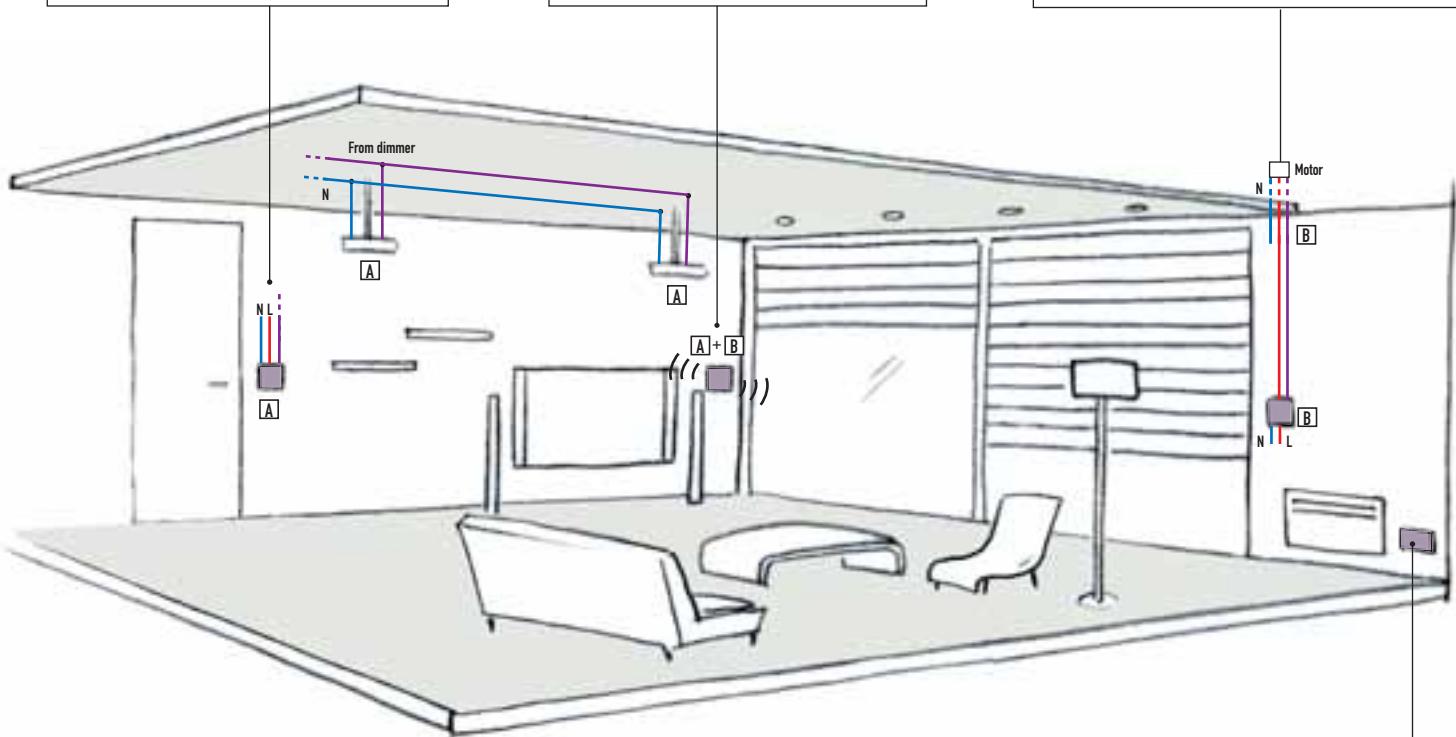

4 SCENARIOS CONTROL
(See p. 124)
For lighting, roller blinds...

► ROLLER BLIND CONTROL

INDIVIDUAL RECEIVER ROLLER BLINDS SWITCH
(See p. 124)
Controls any type of electric roller blind motor

[A] Indicates lighting control
[B] Indicates roller blinds control

► TECHNICAL ALARM

TECHNICAL DETECTORS
(See p. 125)
Give a warning if there is a water, town gas or methane leak

Cover plates selection chart (p. 120 to 121)
 Switches and dimmers max. loads selection chart (p. 126)

Standard rocker plates and plates can be replaced by touch plates (p. 125)

Pack	Cat.Nos		Control mechanisms (receivers) 100-240 V
1	White 5738 12	Black 5738 13	To be installed in flush-mounting boxes min. depth 40 mm 2 modules to be equipped with cover plates (p. 110-117)

ZigBee®: Certified product - Manufacturer Specific Profile

BUS/SCS technology

With 2 dedicated wires, for creating scenarios that incorporate all the functions for large living areas: lighting, automation, video door entry system, etc.

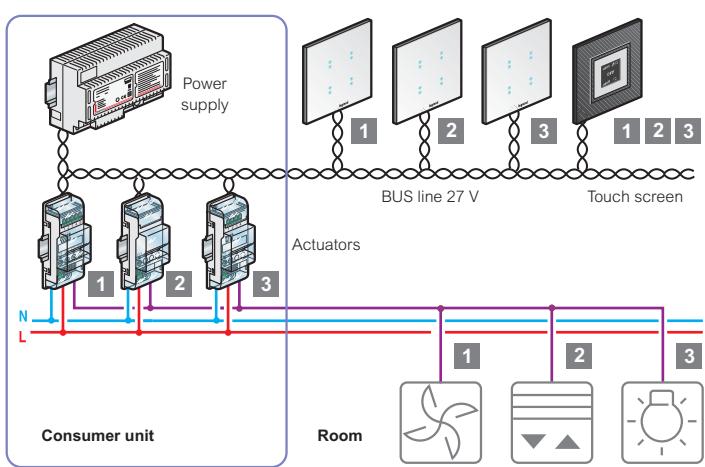

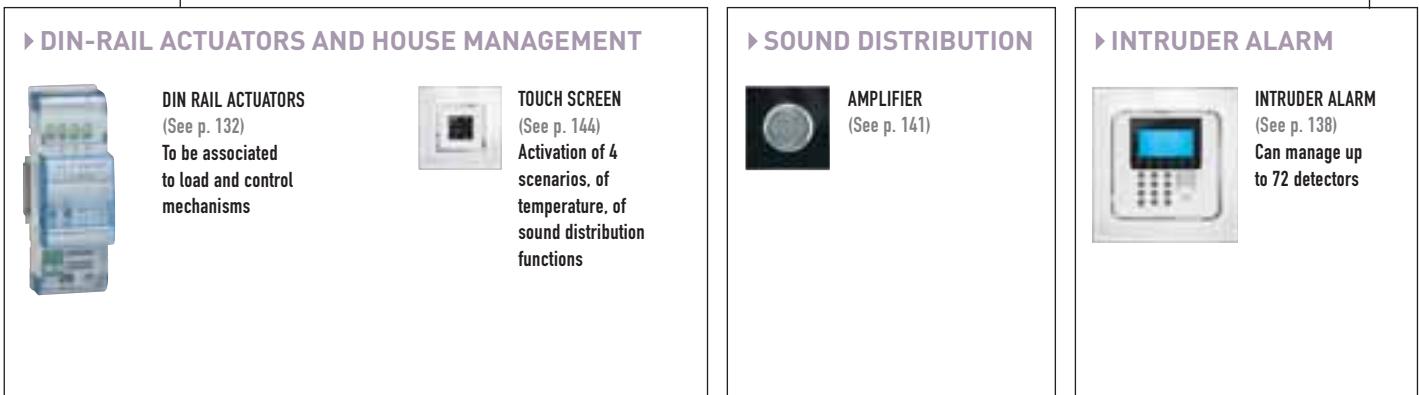

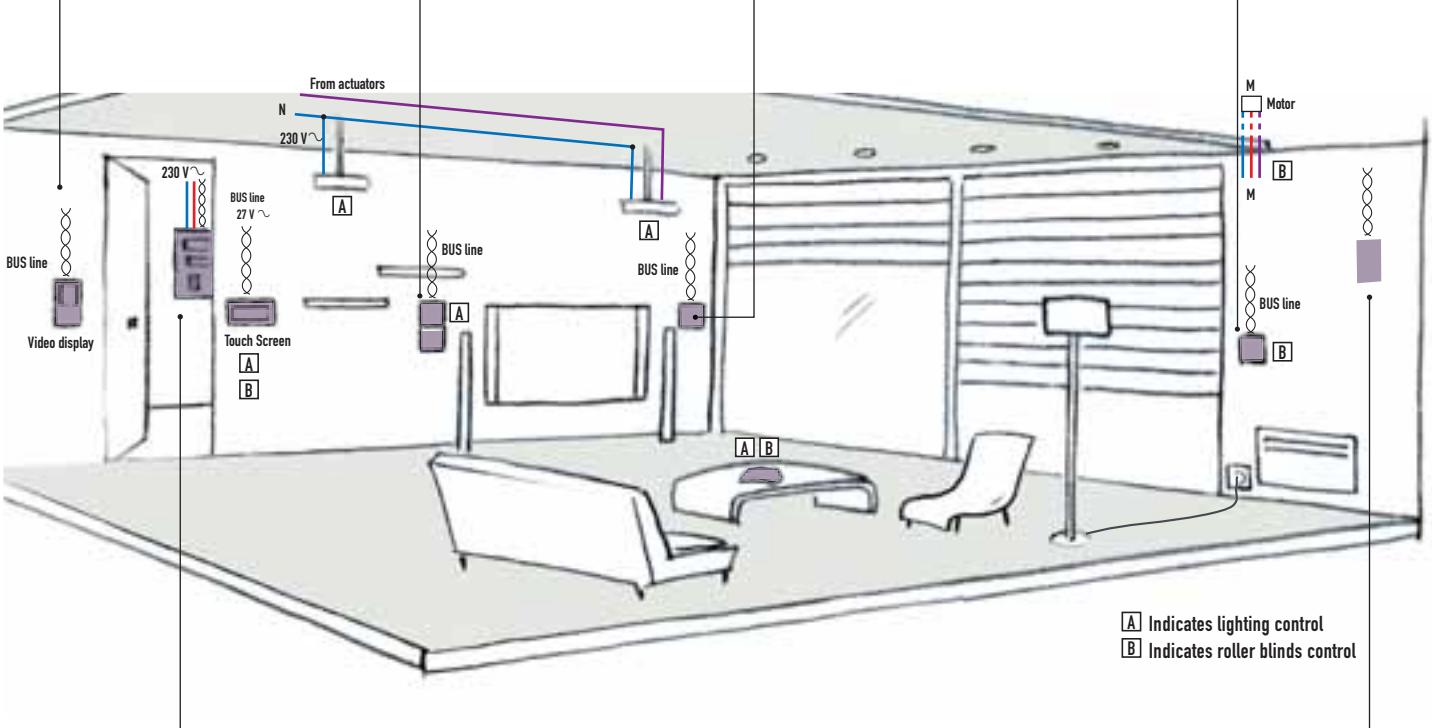

MULTIPLICATION OF FUNCTIONS WITHOUT ANY SPACE CONSTRAINTS.

Legrand BUS/SCS technology can manage various different functions at the same time via 2-wire extra low voltage cables.

It enables a number of functions which can be integrated through scenarios and designed to adapt the user's environment as required.

WIRING DIAGRAM

Arteor™ BUS/SCS

lighting control and automation control mechanisms

Cover plates selection chart (p. 118 to 121)

Pack	Cat.Nos	Micropush control mechanisms
1	5739 74	To be installed in flush-mounting boxes Basic functions To be equipped with round version key covers (p. 131) and cover plates (p. 110 to 117) 2 module mechanism Control for the activation of 1 actuator for single or double loads, or 2 actuators for single load, or independent double loads for lighting and shutters
1	5739 75	3 module mechanism Control for the activation of 3 actuators for single or double loads, or 2 actuators for single load or independent double loads Basic and special functions To be equipped with round version key covers (p. 131) and cover plates (p. 110 to 117) 2 module mechanism Control for the activation of 4 scenarios, soft-start and soft-stop of dimmers, sound distribution functions and activation of devices installed on different BUS branches
1	5739 87	Scenario controller Equipped with White or Magnesium round version rocker plates, to be equipped with cover plates (p. 110 to 117) 2 module mechanisms Control for the activation of 4 scenarios stored in the DIN scenario module Cat.No 0035 51 (p. 133)
1	5739 02 5739 03	White Magnesium

Pack	Cat.Nos	IR receivers
1	5739 00 5739 01	White Magnesium To be associated with remote control Cat.No 0882 31 Can receive up to 16 commands

Pack	Cat.Nos	Mobile scenario controller
1	0882 31 ⁽¹⁾	Advanced IR remote controller 4 push-buttons to control 4 scenarios (1 scenario can control several functions: shutters, lighting...) To be used in association with IR receiver Cat.Nos 5739 00/01

Pack	Cat.Nos	Touch control mechanisms
1	5739 08 5739 09	Equipped with White or Black touch plates Basic functions Control for the activation of 1 single actuator for single or double loads, or 2 actuators for single load, or independent double loads for lighting and shutters 2 module mechanisms For Indian standard flush-mounting boxes
1	5739 04 5739 05	3 module mechanisms Can control up to 4 scenarios For Indian standard flush-mounting boxes
1	5739 12 5739 13	4 scenarios Can control up to 6 scenarios For Indian flush-mounting boxes

Pack	Cat.Nos	Touch screens
1	5739 16 5739 17	Equipped with White or Magnesium surround, to be equipped with cover plates (p. 110 to 117) 1.2" touch screen for activation of 4 scenarios or temperature, or sound distribution functions To be equipped with 2 module plates

Scenario controllers with specific marking for hotels (see p. 74)

1	0261 45	Kit with "0 to 9" jumpers (10 pieces of each figure)

For complete technical information see
"Arteor™ - Project and installation Guide 2009"

■ System principle

The Lighting Control system allows the management of different functions in a simultaneous and integrated way. All the components of the Lighting Control system are interconnected via an electronic circuit that can be programmed: the BUS. The information is exchanged through the 2 wire BUS cable at low voltage (27 V_{dc})

There are two types of devices in the system:

- the controls units, which are connected only to the BUS cable and
- the actuators, connected both, to the BUS cable and to the 230V~ power line for managing the connected load

When the Lighting Control system devices are configured properly, it is possible to manage the load as follows:

- control for a single load
- control for one or more load groups;
- simultaneous management of all loads

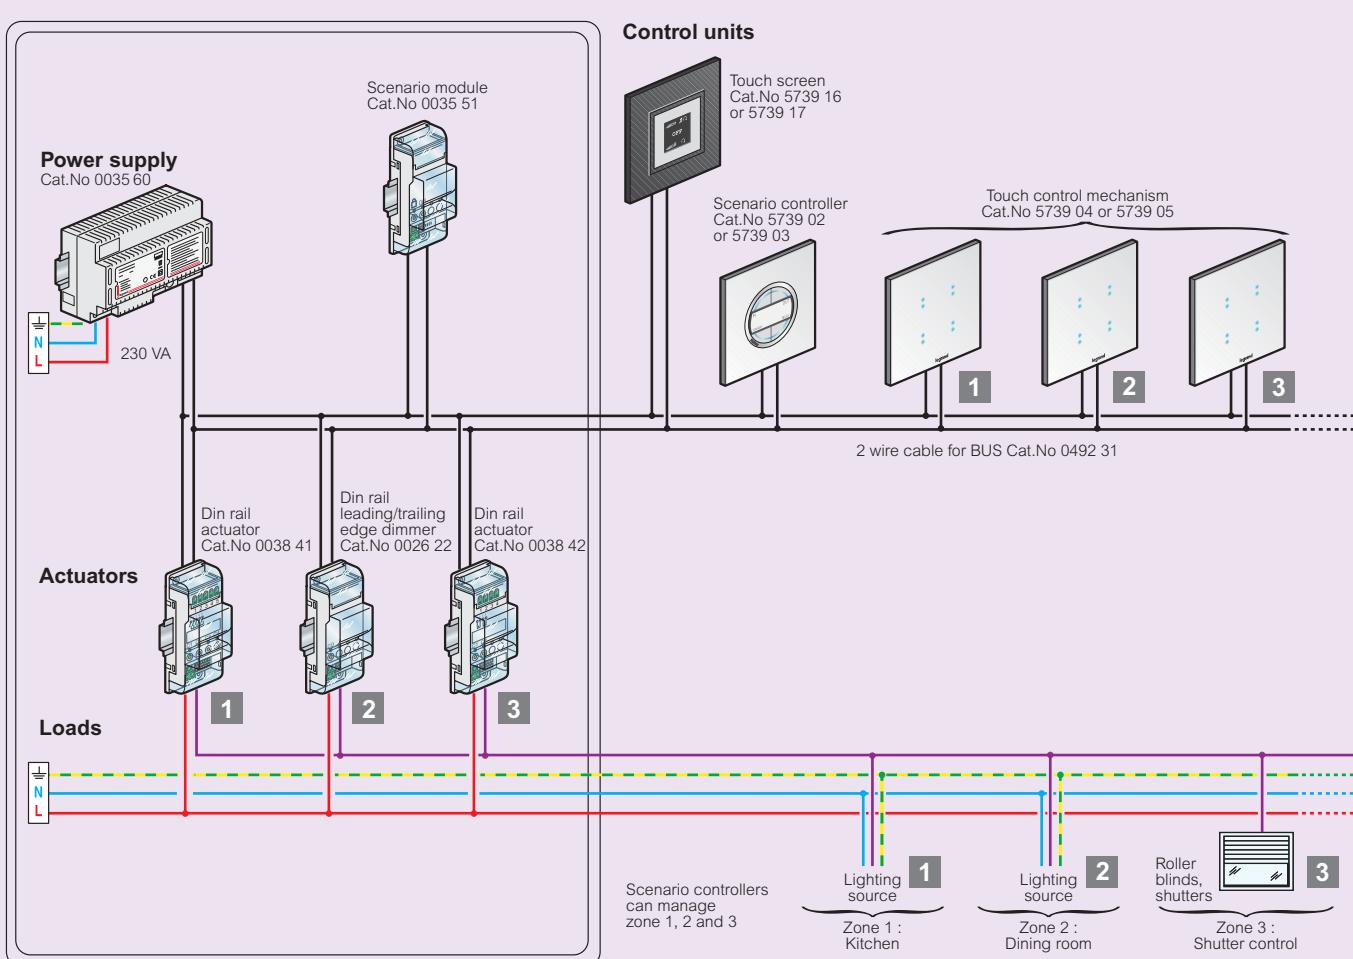

It is also possible to carry out special functions, which can hardly be achieved with conventional electrical systems.

These functions are called scenarios.

One scenario is a set of simultaneous control of multiple groups of loads, used in order to modify the environment according to the user's needs. An example of a scenario can be represented by the simultaneous activation of lights, which can be set by the user after getting inside the building by using one single control device or by using the Touch Screen menu

Volumetric presence detector with passive infrared rays
Alarm signal LED with memory
8 meters range, 14 bands divided over 3 levels
Possible activation of auxiliary prealarm channel
Fixed IR detector
Angular opening 105°

Adjustable IR detector
Angular opening can be divided from 105° to 0°
Swivel lens on 2 axes

Double technology detectors (IR and MW)

Volumetric presence detector made up of two sensors: one infrared to detect hot bodies (IR) and one with microwaves to detect movements (MW)
The alarm is only triggered when both detection technologies are activated

Pack	Cat.Nos	
1	White 5739 44	Magnesium 5739 45
1	5739 46	5739 47

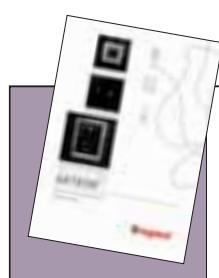

Keypads

Equipped with White or Magnesium square version cover plates
Alarm activation/deactivation keypad via numeric code
2 module mechanism
To be equipped with 2 module cover plates (p. 110 to 117)
Display activation/deactivation keypad via numeric code
Allows the visualization of information and manages other functions such as independent management of zones
To be equipped with special plates (p. 118 to 119)
Supplied with support frame, flush-mounting box and battery 7.2 V Cat.No 0675 18

Pack	Cat.Nos	
1	White 5739 48	Magnesium 5739 49

Transponder readers

Equipped with White or Magnesium square version cover plates, to be equipped with cover plates (p. 110 to 117)
2 module mechanisms
Transponder reader which activates/deactivates the system with the transponder (badge)
Able to store up to 30 transponders

■ System principle

The burglar alarm system permits to protect the home from the intrusion through the protection of ambiances and perimeters
The system is composed by a flush-mounted central unit with integrated dialler, IR detectors and perimeter sensors
All the devices are connected with a low voltage (27 V) twisted pair not polarized
Through the dialler it's possible to be informed in case of alarms and also control the system with the telephone (arm/disarm) and check in each moment the status
On the central unit it's possible to arm/disarm and change the active areas through code number or badge transponder
Up to 50 different user IDs
Limitation in terms of accessible areas and time slot can be assigned to each user
200 events are stored in the central unit to know exactly what happened on the system
The system can manage also technical alarm (example: gas, flooding) with the possibility to be informed locally through indoor sounder and with automatic closure of valves

Home networks: music, video, data everywhere in the house

With Legrand home networks users can enjoy distributed audio and video around the house as well as access to computer and telephone networks wherever needed.

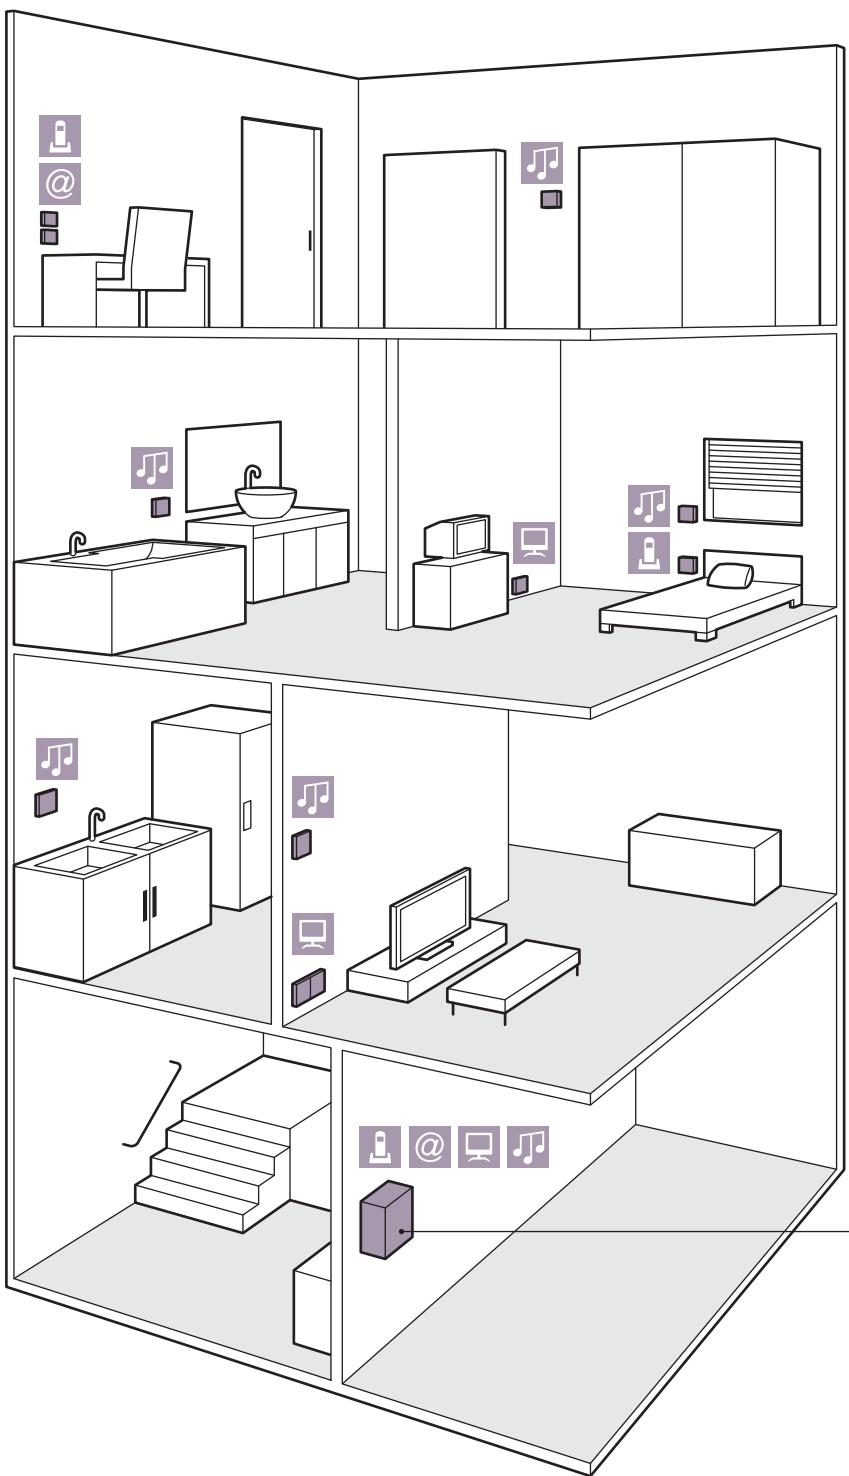

With this flexibility, rooms blend seamlessly into one, yet each with the capacity for independent control, allowing users to see, hear and interact with whatever they want, wherever they want. Users enjoy their favourite CDs, MP3, radio station or even the audio signal from TV, at anywhere in the house. Legrand home networks will distribute sound from a central source to speakers throughout the home.

Arteor™ home networks structured wiring - audio

■ Installation principle for distributed audio system: 4 source input - 8 zones

You can listen to any one of four audio sources in up to 8 different locations at the same time

Technical characteristics

- High-quality stereo music in 8 rooms
- Select from four unique music sources in every room
- Amplified keypad volume controller
- Local source inputs allows different music in three rooms
- Infrared remote control for easy sound management
- Expandable up to 32 locations

Composition of the installation

- Keypad volume controller in each room
- Local source input in desired room (local listening)
- Loudspeakers in each room
- 4 sources 8-zone distribution module in enclosure
- Single and/or triple source input devices Cat.Nos 6338 22 and/or 6338 48 in living room

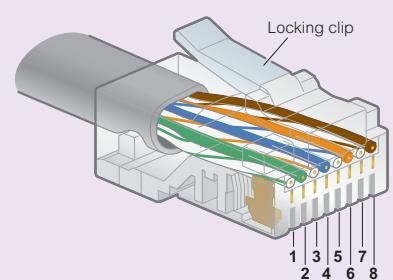

■ RJ 45 plug wiring installation

Plug your cable with connector

- Strip your cable and untwist the pairs
- Cut/cross all wires
- Insert it into EZ RJ 45 connector Cat.No 6338 51
- Clip wires in RJ 45 connector Cat.No 6338 51
- Crimp connector with EZ crimp tool Cat.No 6338 99
